

**Pulses Domestic Fundamentals:**
**Today's Update:**

- Lentil traded down by 3% in major markets including Kanpur and Ashok Nagar due to new crop arrivals during the week under review. As per AgriWatch, Lentil production is expected to remain good at 13.89 lakh tonnes this year due to increase in sowing area and higher yields amidst conducive weather throughout the season. Lentil expected to trade in a range of INR 100-200 per quintal with slightly weak bias in coming days

**Previous Update:**

- As per IMD's recent "Long Range Forecast for Southwest Monsoon 2023", with 67 percent probability for normal to above normal rainfall, a normal rainfall is predicted this year. It also added that El Nino impact may be felt during the second half of the monsoon. About 40 percent of El Nino years in the past were years with normal or above normal monsoon rainfall.
- On the other hand, according to the Skymet pre-monsoon forecast, the country is likely to witness below-normal monsoon rainfall this year with a 20 percent chance of drought due to the end of La Nina conditions and the potential for El Nino to take hold. It would be early to predict the impact of the same on Pulses sowing and production as crop size depends on other parameters too including timely rains, distribution patterns and its range. Moreover, IMD is also expected to release its forecast this month which needs to be evaluated accordingly before any conclusion.

**International Market Update:**

- According to Statistics Canada, Red Lentil exports from the country increased by 3% to 1,16,479 MT in February from 1,13,473 MT in January. Turkey emerged the biggest buyer with buying 1,09,862 MT Red Lentil followed by USA and Belgium those purchased 1662 MT and 837 MT respectively.
