

**Masur Domestic Fundamentals:**
**Today's Update:**

- As per official release, India has imported a total 1,38,272 MT of pulses including 38,288 MT Tur, 31,625 MT Urad, 61,999 MT Masur, 510 MT Moong, 240 MT Bengal Gram and 5,611 MT Kabuli in May 2023. In May 2022, total import of pulses was 0.54 LMT.
- As per official release, India has imported 61,999 MT of Lentils' during the month of May 2023 as compared to 16,113 MT in May 2022. Amongst which 53,460 MT has been imported from Australia and 7,721 MT from Canada, 500 MT from US and 319 MT from UAE.

**Previous Update:**

- During the week under review, Lentil experienced mixed trading due to lower levels of trading activity. This can be attributed to a surplus in supply caused by regular local arrivals and ongoing imports from Canada and Australia at more affordable prices. Lentil prices are expected to remain within a certain range until the demand for the festive season emerges. It is anticipated that demand will improve by the end of July, but there is no expectation of a sudden increase in prices in the coming days, considering the balance between supply and demand. According to official reports, India has already imported approximately 4 lakh tonnes of lentils in the first four months of the current calendar year (January to April). The price of Lentil is projected to fluctuate within a range of INR 100-200 per quintal.
- Lentil traded at INR 5950 per quintal in Kanpur and while it remained stagnant at INR 5975 per quintal in Indore.

**International Market Update:**

- Pulses export specially Lentil and Peas are expected to be hampered from Canada due to closure of its West Coast port owing to workers' strike. However, much impact is not likely at present as export pace during the month of July and August remains slow which normally surges in September. At that time, bulk export figure jumps up to 20-23% in case of all peas while it increases up to 15-17% in case of Lentil.
