According to AgRural consultancy, soybean planting in Brazil has covered 20% of the area. This is higher than the five-year average of 19% and below previous year's coverage area of 29%. Around 27% of the area has been planted in Mato Grosso state, lower than previous year's planted area of 47%.

According to latest USDA attaché report, heavy rains in Argentina during the months of August and September have affected Argentina's crop areas. Local reports estimate 5-10 million hectares could be underwater or damaged due to these rains. While excess rain has affected the winter crop, this is not currently expected to affect soybean, peanut, and sunflower planted area, although planting may be delayed.
