

CBOT soymeal continued to trade over lack of strong fundamentals. The near month contract is in extended period of consolidation from mid of June. Indian physical meal prices are also in extended period of consolidation lead by soymeal.

- As the central India is observing good rains the weather premium if any has faded away and now all eyes will be on final production numbers. Market is saying production in between 90-100 lakh tons whereas AW has kept in between 103-105 lakh tons.
- SOPA survey is indicating lower pod setting in 5-10% of crop in MP and Maharashtra due to moisture stress and this may result in the lower pod settings and we can expected below average production these areas but which can be easily offset by many areas where the weather conditions remained on time and above average yield can easily offset the lower yield in these areas.
- SOPA is aiming to capture at least 2-3 per cent of the Chinese bean/meal market which could translates into export 30-35 lakh tonnes of the meal. All depends on now the Chinese demand as China can single handedly can take all exportable surplus of India.
- As China is booking Canadian Rapemeal at premium as compared to what Indian exporters are offering coming months
 looks rosy for Indian rapemeal exports. China used to import 4 lakh tons of rapemeal earlier till 2011 but banned it over the
 issue of dye into meal.

Soy DOC Rates at Different Centers

	Ex-factory rates (Rs/ton)		
Centres	21 -Aug-18	20 -Aug-18	Parity To
Indore - 45%, Jute Bag	27600	28000	Gujarat, MP
