

- _CBOT soymeal weaken further for the 4th session nearing the last low and is on the verge of breaking extended period of consolidation from mid of June.
- India is expected to restart rapeseed meal export to China as the country sought towards other sources of protein meal. The Commerce Ministry had organised a video-link with Chinese officials last week to explain to them that their fear of contamination in rapeseed meal is unfounded as all pests are destroyed when rapeseed meal is processed at extreme heat.
- Earlier, China had been importing 4-5 lakh tonnes of the material till 2012, when it banned Indian shipments over issues of contamination especially the presence of Malachite Green which is used in labeling the sacks.
- India might see booking of soybean to China if the price falls below 2900 per quintal and there is limited fall of US Soybean FOB from current levels. Indian bean at Chinese ports in that even will become cheaper over the US soybean. Thus with production remaining crucial Indian bean is expected to continue to trade in the range bound manner.
- Further as the domestic demand of soymeal is itself increasing prices is expected to hesitate to fall below the 3000 per quintal mark.
- The Argentinean meal is at premium over CBOT meal due to lower production in Argentina and hence Indian meal need not to fall below 26000-25000 per ton to gain parity. Overall there is little potential for the bean prices to fall aggressively.
