

Physical market gained over improvement meal demand from poultry farmers to meet the poultry demand of post sawan period.

- Mustard is currently helping itself to find bearishness from Soybean and currently hesitating to go above the difference of INR 830 to 840 on upside and correcting the spreads thereafter towards 720 to 740. In present scenario any bearish move in soybean will also help mustard to fall, unseasonal.
- India is also waiting for green signal from China for soybean exports to the nation and if prices plunges towards 3000 or below India might find exports parity to China against US soybean at Chinese ports.
- As we slip in to Sep month the key fundamental that will take the center stage is the daily arrivals. A daily arrivals to the tune of 8.5 to 9.5 lakh bags indicates the production around 100 lakh tons on an average. Cumulative monthly arrivals and quarterly arrivals will help in assessing the production further.
- Further as there are fair chances of prices to fall below MSP of INR 3450 it will be interesting to see how center and State is going to intervene to give the MSP prices to farmers. Last year MP implemented BBY (Bhavantar Bhugtan Yojana) and there are good chances that the center will also intervene and ask NAFED to procure soybean under PSS.
- Maharashtra state government has said there will not be any action taken if the traders and stockiest buy produce below MSP. Earlier there was notification that if any stockiest is found to procure produce below MSP, will result in 1 year of imprisonment and rupees 50 thousand as penalty/fine will be collected.
- From the crop progress for the first two week of Sep there has been sporadic rainfall forecast with intermittent sunny spells in all key soybean growing regions which is going to help soybean grains to get bolder and also will not going to result in damages at the time of crop maturity.
