

- Cash Soymeal market remained unchanged in today's trade at physical market. CBOT Soymeal prices unchanged today.
- China may import less soybean as African swine fever (an incurable pig disease) has reduced animal feed demand there. China crush China crushes millions of tonnes of imported soybeans each year to produce Soymeal to feed its huge livestock herd.
- As per SEA recent report, India exports total 283,850 tons of Oilmeals during January 2019 higher than 269,668 tons in previous year during the corresponding period of time. Total exports volume of Oilmeals is recorded up by 7% at 2,692,452 tons during April 2018 to January 2019 against 2,516,657 in previous year during the same period of time. Total shipment of Rapeseed meal went up at 897,537 tons in first ten months (April to January 2019) against 486,917 during the same period of time in previous year supported by major buyers like South Korea, Vietnam and Thailand. Thailand shipped 65% higher rapeseed meals to 263,280 tonnes in the current season .
- According to recent WASDE report, there is no changes in Soybean meal production as the higher crush is offset by a lower extraction rate. Lower supplies and increased crush are partly offset with a 25-million-bushel reduction in exports. Ending stocks are estimated down by 45 million to 910 million bushels from its earlier forecast.
- Now, Iran is ready to buy Soybean meal from India. Iran bought total 2.8 lakh tons of Indian Soybean meal during April to January 2019 which is higher from 23000 tons in previous year record.
- Indian soymeal premium quoted higher side by \$106 per ton over Argentinean meal with Indian meal bullishness producing the premium rather than Argentinean meal bearishness. Such premiums may limit bookings of Indian Soymeal for forward as well as spot market.
