

Soy Meal Fundamentals: Soymeal continued downtrend on bearish supply outlook and weak export sales, Saturday. There is a dull demand from major consuming sectors like poultry and feed manufacturers. Currently there is no sign of recovery in soymeal demand. Soymeal consumption is severely hit due to the slack in demand from poultry sector with subsequent fall in poultry demand mainly due to coronavirus pandemic. Soymeal (Indore) fell to Rs. 29,200/MT compared to Rs. 29,500/MT previous day.

- Given the domestic soybean stock, there is a bullish supply scenario in domestic soymeal.
- There is a weak overseas demand of the Indian origin soymeal. India's oilmeal exports during the 2019-20 fiscal year beginning April declined 27% to 2.43 million tonnes, said the Solvent Extractors' Association of India. India's oilmeal shipments fell 60% in April from a year earlier, as higher government-set oilseed MSP made the shipments uncompetitive. India exported 102,001 tonnes of oilmeal in April 2020, said the Solvent Extractors' Association of India.
- India's mustard meal exports fell 14% to 961,312 tonnes in 2019-20 (Apr-Mar) due to weak purchases by major buyers, according to data released by The Solvent Extractors' Association of India. India's mustard meal shipments plunged 82% on year to 21,493 tonnes in April due to weak orders by major buyers, figures by the Solvent Extractors' Association of India. The data for the month of May is yet to be released by the association.
- India's soymeal shipments may fall to around 500,000 tonnes in 2019-20 (Oct-Sep), less than one fourth of the year-ago figure of 2.1 million tonnes due to slack in demand from traditional overseas buyers amid ongoing lockdowns, said, Soybean Processors Association of India Chairman Davish Jain.
- India's soymeal production of the country is likely to stand at 62.78 lakh tonnes. Carry over stock of Soymeal is estimated at 1.59 lakh tonnes and 1.37 lakh tons of carry forward stocks. While export sea and land may stand at 10 lakh tonnes lower output and non-competitive prices in world market. India had exported total 22 lakh tonnes in last year in 2018-19 season. Domestic consumption of Soymeal (Food) is estimated at 5.50 lakh tonnes and 47.50 lakh tonnes for Feed. In October month, India has exported total 0.50 lakh tonnes of Soymeal lower against 1.31 in Oct 2018 on lower overseas demand.
- During the week (June 05 to June 11, 2020) US net sales of 124,000 MT for 2019/2020 were down 40 percent from the previous week and 54 percent from the prior 4-week average. Increases primarily for Morocco (45,000 MT), the Philippines (24,100 MT), Canada (23,200 MT, including decreases of 600 MT), Ecuador (15,000 MT), and Peru (6,200 MT, including 6,600 MT switched from unknown destinations and decreases of 400 MT), were offset by reductions for unknown destinations (12,000 MT), El Salvador (6,000 MT), Jamaica (1,100 MT), and Belgium (600 MT). For 2020/2021, net sales of 58,000 MT were reported for Morocco (30,000 MT), Ecuador (20,000 MT), Guatemala (6,000 MT), Mexico (1,300 MT), and Canada (700 MT). Exports of 200,800 MT were up 11 percent from the previous week, but down 11 percent from the prior 4-week average. The destinations were primarily to the Philippines (50,200 MT), Jamaica (29,900 MT), Canada (23,200 MT), Mexico (20,400 MT), and Peru (18,200 MT).
- In the May'20 report, USDA has kept India's soymeal production at 6.64 million tonnes for 2019/20 in lower from 7.68 million tonnes in 2018/19 season. Domestic consumption is also placed unchanged at 5.49 million tonnes for this season which was estimated at 5.28 million tonnes last season.
