

November 18, 2020

**Soy Meal Fundamentals**: The domestic soymeal prices posted gains on buying support from the poultry units and feed manufacturers. However, overall slack in poultry consumption due to COVID pandemic has hit the soymeal demand.

- The global soy outlook is bullish with forecast of dry weather in Latin America and downward revision of the US 2020/21 crop which have been recently harvested and strong Chinese soy demand.
- India's September 2020 soymeal exports improved by 94% to 68,576 metric tonnes compared to 35,268 metric tonnes in the same period last year. However, it fell by 13% to 3,17,915 metric tonnes in aggregate, during the last five months (Apr.-Sept.) of financial year 2020-21 compared to 3,63,901 metric tonnes during the corresponding period last year.
- India's export of oilmeals for the month of September 2020 is reported at 2,86,957 metric tonnes compared to 1,41,184 metric tonnes in September, 2019 i.e. up by 103%.
- The overall export of oilmeals during April to September 2020 is also reported up by 1% at 13,00,134 metric tonnes compared to 12,87,479 metric tonnes during the same period last year.
- US has turned out to be potential market for Indian Organic Soymeal. In 2019-20, India had shipped over 193,000
  metric tonnes of organic soymeal. In current year, from April-Sept. (6 months), India shipped over 115,000 metric
  tonnes to US. US is the largest producer of Genetic Modified (GM) soybean in the world, looking to India for supply
  of organic soybean meal.
- Overall India's soymeal exports were too low consecutive second year, during 2019-20 marketing year it stood at 5 lakh tonnes which was 4.6 lakh tonnes in 2018-19.
