

**Soy Meal Fundamentals:** Weak sentiments witnessed in the domestic soymeal on decline in off-take. Improved overseas demand in soymeal in last couple of months remained supportive for the meal to some extent in recent while. Overall slack in poultry consumption due to COVID pandemic has hit the local soymeal demand. We expect the poultry demand to gradually improve in coming days.

International soymeal prices are appreciating due to the supply concerns and decline in Argentine soybean crushings and shipments in December 2020, following strike at crushing plants and export terminals. It has been over a fortnight since the workers have called on the strike on wage woes.

The Argentine soymeal prices have got dearer in last couple of months due to lean season, this has narrowed down the price spread of India vs Argentina, opening some exports window for India.

- India's November 2020 soymeal exports improved by +186% to 1,98,776 metric tonnes compared to 69,415 metric tonnes in the same period last year. Further, the soymeal shipments improved by +28% to 6,36,981 metric tonnes in aggregate, during the last seven months (Apr.-Nov.) of financial year 2020-21 compared to ,49,7116 metric tonnes during the corresponding period last year.
- India's export of oilmeals for the month of November 2020 is reported at 3,31,171 metric tonnes compared to 2,08,401 metric tonnes in November 2019 i.e. up by +59%.
- The overall export of oilmeals during April to November 2020 is also reported up by +12% at 19,48,699 metric tonnes compared to 17,34,875 metric tonnes during the same period last year.
- US has turned out to be potential market for Indian organic soymeal. US was the largest importer of soymeal of Indian origin. In November 2020 India has shipped 1,49,747 metric tonnes of soymeal to the country. US is the largest producer of Genetic Modified (GM) soybean in the world, looking to India for supply of organic soybean meal.
- In-spite of tough competition in world market, export of rapeseed meal and ricebran extraction performed well, during the last seven months of financial year 2020-21.
- The export of rapeseed meal in November'20 is reported at 45,050 metric tonnes against last year 73,235 metric tonnes during the same period i.e. down by -45%, and ricebran extraction is reported at 50,089 metric tonnes against last year 12,157 metric tonnes i.e. more than quadrupled (312%), higher processing of de-oiled ricebran increased availability for the export. Bangladesh re-emerging large importer of rapeseed-meal and ricebran. extraction.
- The global soy outlook is bullish with forecast of dry weather in Latin America and downward revision of the US 2020/21 crop which have been recently harvested and strong Chinese soy demand.

Soy DOC Rates at Different Centers			
Centres	Ex-factory rates (Rs/ton)		
	05-Jan-21	04-Jan-21	Parity To

Castor Extr.	4250	4150	100

**Outlook:** The domestic soymeal prices are expected to feature range-bound movement with firm bias on recovery in soymeal export sales in near term. However, sluggish local demand from poultry will limit the gains.
