

Soy Meal Fundamentals: Mixed trends are depicted in soymeal prices today amid mixed sentiments in the market. Declining bird flu cases are also a support for soymeal market.

As per sources, India has shipped higher soymeal in January 2021. The soymeal exports are recorded significantly higher by 484% year on year to 336,390 tonnes against last season after robust demand from overseas markets (European and Asian buyers). France, Germany, Indonesia and Bangladesh were the major buyers. India exported total 950,134 tonnes in the first four month of 2021/21 marketing year. The exports is likely to rise more than 2 million tonnes in 2020/21 against 825,000 tonnes in last season.

As per Refinitiv commodity research, the export of soymeal in Argentina went up by 38% in January 2021 against the previous year's record. The shipment of soy oil also increased and touched the level of 477 thousand tons, the highest January export since 2017. However, the export may fall in the coming month once the harvesting will start in Brazil and buyers may switch to the Brazilian soybean crop.

The Argentine soymeal prices have got dearer in last couple of months due to lean season, this has narrowed down the price spread of India vs Argentina, opening some exports window for India.
