Soy Meal Fundamentals:

Today's Update- Soymeal Indore prices went up by 1.2% to Rs. 43,000/MT as compared to previous day tracking firm cues from global market. In other markets Soymeal traded with steady to weak bias amid weak demand. Soymeal prices in the domestic market are expected to trade range bound in the range of 40,000-45,000 in near term tracking revival of soy meal export demand.

As per USDA latest report, India's 2022/23 meal imports are forecast to decline and remain lower than the 5-year average as domestic supplies are now trading at a discount to major global supplies. Also, the additional TRQ for soybean meal imports ended September 30 with no indication of extension. The lower prices will raise India soybean meal exports in 2022/23 by 65 percent compared to the previous year, putting them slightly below the 5-year average.

Soybean meal in South America saw weaker average prices in November. The premium for U.S. soybean meal compared to South American widened slightly this month with U.S. prices increasing modestly, mostly driven by strong domestic disappearance. Soybean meal prices began to rally at the beginning of December on rising concerns about potential crop losses in Argentina which would lead to reduced soybean crush and lower exportable supplies and the announcement of a lower-than-expected U.S. biofuel blending proposal.

Currently, Indian Soymeal FOB prices trading at \$535/MT, Argentina Soymeal FOB prices trading at \$539/MT and spread stands at \$-4/MT. Decline in Argentine soymeal prices has led to a squeeze in spread. Upon squeeze in spread Indian soymeal export demand is rising and so the prices are improving.
