

Soy Meal Fundamentals:

Today's Update- Soymeal Indore prices remained steady at INR 43,000/MT as compared to previous day. Year-to-date Soymeal prices are up by 1.2%. Soymeal prices in the domestic market are expected to trade range bound with weak bias in the range of 42,000-45,000 in near term tracking good export demand.

Between August 2021 and October 2021, the prices of Ex-Kandla Soymeal reached a record high of US\$ 1235/ton, which was 152% higher than the Ex-Rotterdam prices at US\$ 472. As a result, India's Soymeal exports decreased. However, in the six-month period between September 2022 and March 2023, the Ex-Kandla prices dropped below those of Ex-Rotterdam, which encouraged exports from India. India has several advantages over Argentina in Soymeal exports, including lower freight charges, the option to export in smaller quantities, the preference for non-GMO Indian soymeal by some European countries and the USA, and the depreciation of the rupee, which boosts overall exports.

During the last month, Ex-Rotterdam prices consistently fell below Ex-Kandla prices, and since last week, the difference has been between 12% and 16%. Soymeal prices have decreased marginally by 0.2% to INR 44,700/ton month-to-date, and Soybean prices have declined by 0.48% to INR 5225/Qtl. If this price difference continues for a prolonged period, there is a possibility that export demand may shift to competing countries like Argentina. Moreover, weaker export demand could lead to further declines in soymeal and soy seed prices in the upcoming weeks.

In April, oil meal exports rose by 48%, propelled by soybean meal shipments

India's overall export of oilmeals experienced a remarkable growth of 48.47 percent in April, driven by a surge in soymeal exports. According to data from the Solvent Extractors' Association (SEA) of India, the country exported 4.93 lakh tonnes (lt) of oilmeals in April 2023, a significant increase from 3.32 lt during the same period in 2022.

BV Mehta, the Executive Director of SEA of India, pointed out that the price of soybeans has dropped to around INR 4,550 per quintal from its peak of INR 7,640 per quintal in April 2022. This decline has made the export of soybean meal more attractive over the past seven months.

In April 2023, India exported 1.77 lt of soybean meal, compared to 24,937 tonnes in April 2022. As of May 12, the price of Argentina soybean meal (ex-Rotterdam) was quoted at \$516 per tonne, while Indian soybean meal (ex-Kandla) was quoted at \$570 per tonne.

Mehta highlighted that Southeast Asia is a major consumer of Indian soybean meal, and India has a logistical advantage in supplying to this region, even in small quantities. Additionally, the depreciation of the rupee is contributing to the overall increase in exports.

Furthermore, the export of rapeseed meal also showed an upward trend. In April 2023-24, India exported 2.46 lt of rapeseed meal, surpassing the 2.29 lt exported during the corresponding period in 2022-23.

According to USDA May'23 report, India's 2023/24, Soybean crush is estimated to be at 9.8 MMT as compared to previous year at 9.9 MMT and country's domestic Soybean consumption is estimated to be at 7.15 MMT Vs 6.72 MMT previous year. Moreover, Soybean exports is projected at 0.8 MMT as compared to 1.45 MMT previous year.

RAPEMEAL EXPORTS

India achieved a remarkable milestone by exporting a record-breaking 22.96 million metric tons of rapeseed meal in the fiscal year 2022-23.

India has established itself as the most competitive supplier of rapeseed meal to various Far East countries, including South Korea, Vietnam, and Thailand, offering it at a competitive price of \$240 per tonne (FOB India). The ex-mill price of rapeseed meal in Hamburg, Germany, has been quoted at \$299 per tonne.

Mustard is currently being sold at 5,100 rupees per quintal, which is below the Minimum Support Price (MSP) of 5,450 rupees per quintal. This decline in mustard prices is a result of the deteriorated prices of edible oil in both international and domestic markets. Consequently, farmers are being discouraged from selling their mustard crop for crushing purposes.
