As per recent Ministry report, India has covered total 69.51 lakh hac. of Mustard area as on 31st Jan. 2020 which is lower by 0.24 lakh hac. against 69.75 lakh hac, in 2018-19. In Rajasthan, farmers have covered total 25.09 lakh hac. higher against 24.77 lakh hac. Farmers have covered total mustard seed area at 12.24 lakh hac. in Uttar Pradesh, 7.04 lakh hac. in MP, 5.87 lakh hac. in West Bengal, 5.62 lakh hac. in Haryana, 2.81 lakh hac in Jharkhand, 1.72 lakh hac. in Gujarat.

Acreage of Mustard in the current season is lower against 2018-19. Mustard crop major growing states are Rajasthan, Madhya Pradesh, and Uttar Pradesh and Haryana state. In Rajasthan, traders expect total 2 to 5% lower mustard sowing area as mustard area may shift to garlic and wheat crop due to good price hike in last season compared to mustard seed prices. Recent rainfall will also support to increase yield of wheat and garlic crop compared to mustard crop. In Baran and Kota district, sowing is likely to be lower by 20%. While in Alwar and Bharatpur districts, it is likely to be equal like 2018 season. However, sowing area may increase nearly 2 to 5 % in Ganganagar district due to good water availability.

High water level in most reservoirs will support to increase yield. However, acreage for Rabi season may decline as sowing has been delayed due to recent rainfall in October and November and late harvesting of Kharif crops. Farmers had waited water to dry up the sowing low lying land. The government expects Mustard seed production at 8.24 MT for 2019-20 lower than last year record i.e. 9.33 million tonnes. Government has announced Rs. 225 higher MSP of Mustard seed for Rabi 2020-21 seasons to Rs.4425 against Rs. 4200 in 2019-20.
