International-

According to Agriculture and Agri-Food Canada's (AAFC), Canada's canola supplies declined from last year by 37% to 14.5 MMT due to drop in carry in stocks by 49% and 35% lower production as a result of last summer's drought. Demand for Canadian canola remains firm on a strong world oilseed crush and high prices for competing oilseeds, vegetable oils and protein meals. Disruption of Black Sea exports of sunflowerseed oil as a result of the Russian invasion of Ukraine is tightening world supplies and supporting world prices. Domestically, processing of canola is estimated to fall to 8.3 Mt, a drop of 20% from last year, while exports are expected to fall by 51% to 5.2 Mt, as commercial buyers outbid exporters for the tight supplies. For the crop year, the major importers of Canadian canola to-date are China, Japan, Mexico and the European Union. Carry-out stocks are forecast to fall by 77% from last year, to a tight 0.40 Mt, for a stock-to-use ratio of 3% versus 8% in 2020-21 and the 5-year average of 13%. Price volatility for canola increased sharply during the past month due to shipping disruptions from the Black Sea Region. For the crop year to- date, Canadian canola prices are estimated at \$1,100/t vs \$730/t last year and the 5-year average of \$556/t. tight stocks.

For 2022-23, the area seeded to canola is expected to decrease by 7% to 8.5 million hectares (Mha) based on Statistics Canada's Seeding Intentions Survey.

According to USDA Attachae, 2022-23 global rapeseed supplies is projected to rise 10 percent to a record 100.5 MMT as production in Canada recovers from last year's devastating drought. Both global harvested area and production are projected to be records. Reduced carryover, the smallest in nearly 20 years, will necessitate some stock-building in the coming year and provide a measure of price support. Exports are projected to rise significantly above this year's current forecast but will fall short of the 2020/21 record volume as stock building and strong crush recovery in Canada restrict exportable supplies. Global rapeseed crush is forecast to reach a record 75.1 million tons.

In Oct'21-April'22, India's Groundnut export went down by 24% to 3.72 Lakh tonnes as compared to 4.89 Lakh tonnes same period last year. Low demand from China attributed to the lower exports, while there is good demand from South East Asian countries like Indonesia, Malaysia and Philippines. In Oct'21-May'22 we expect India's groundnut export at 3.9-4 Lakh tonnes.

In Oct-April'22, India's Groundnut oil export went down by 95% to 9,701 tonnes as compared to 2.11 Lakh tonnes previous year same period. In Groundnut oil too, the lower exports can be attributed to low demand from China. Last year China imported groundnut oil heavily from India on account of local crop damage. In Oct-June'22 we expect India's Groundnut oil export at 10000-12000 tonnes.

Despite low export demand prices remained firm on the back of firm domestic demand.

Groundnut Price Outlook for coming week: Rajkot groundnut bold prices expected to trade steady to firm amid good domestic demand.
