And in June 22 exports recorded up by 180% to 3.08 Lakh tonnes vs 1.10 Lakh tonnes in the previous year same period. Upon record crop of rapeseed and crushing resulted in the highest processing, availability of rapeseed meal and export. Currently India is the

most competitive supplier of rapeseed meal to South Korea, Vietnam, Thailand and other far east countries. In upcoming months too, we expect good exports amid firm demand from South east Asia.

Production- As per Agriwatch, the production is expected to be 107.1 Lakh tonnes, which is all time high production. Rajasthan's mustard crop production is estimated at 45.1 Lakh tonnes, Madhya Pradesh at 11.7 Lakh tonnes, Uttar Pradesh at 14.10 Lakh tonnes. It is estimated that 102.5 Lakh tonnes will be crushed, which would translate into 43.05 Lakh tonnes oil and 59.45 Lakh tonnes RM seed DOC production.

According to USDA's April'22 reports India's 2021-22 RM seed production estimated at 108 Lakh tonnes as compared to last year estimates at 85 Lakh tonnes, crushing estimated at 96.50 Lakh tonnes as compared to 75 Lakh tonnes previous year.

As per 3rd Advance estimate released by the Department of Agriculture and Farmers Welfare, RM seed production during 2021-22 is estimated at 117.54 Lakh tonnes Vs 114.59 Lakh tonnes in 2nd advance estimates and 102.1 Lakh tonnes last year.

Trade body Central Organization for Oil Industry and Trade (COOIT) has estimated Mustard Rabi 2022 crop at 113 Lakh tonnes marginally up from 110 Lakh tonnes last month, total production includes taramira too. COOIT has estimated mustard crop production in Rajasthan at 51 Lakh tonnes, 17 Lakh tonnes in Uttar Pradesh, 12.5 Lakh tonnes in Madhya pradesh.

International-

According to Agriculture and Agri-Food Canada's (AAFC), Canada's canola supplies declined from last year by 37% to 14.5 MMT due to drop in carry in stocks by 49% and 35% lower production as a result of last summer's drought. Demand for Canadian canola remains firm on a strong world oilseed crush and high prices for competing oilseeds, vegetable oils and protein meals. Disruption of Black Sea exports of sunflowerseed oil as a result of the Russian invasion of Ukraine is tightening world supplies and supporting world prices. Domestically, processing of canola is estimated to fall to 8.3 Mt, a drop of 20% from last year, while exports are expected to fall by 51% to 5.2 Mt, as commercial buyers outbid exporters for the tight supplies. For the crop year, the major importers of Canadian canola to-date are China, Japan, Mexico and the European Union. Carry-out stocks are forecast to fall by 77% from last year, to a tight 0.40 Mt, for a stock-to-use ratio of 3% versus 8% in 2020-21 and the 5-year average of 13%. Price volatility for canola increased sharply during the past month due to shipping disruptions from the Black Sea Region. For the crop year to- date, Canadian canola prices are estimated at \$1,100/t vs \$730/t last year and the 5-year average of \$556/t. tight stocks.

For 2022-23, the area seeded to canola is expected to decrease by 7% to 8.5 million hectares (Mha) based on Statistics Canada's Seeding Intentions Survey.

According to USDA Attachae, 2022-23 global rapeseed supplies is projected to rise 10 percent to a record 100.5 MMT as production in Canada recovers from last year's devastating drought. Both global harvested area and production are projected to be records. Reduced carryover, the smallest in nearly 20 years, will necessitate some stock-building in the coming year and provide a measure of price support. Exports are projected to rise significantly above this year's current forecast but will fall short of the 2020/21 record volume as stock building and strong crush recovery in Canada restrict exportable supplies. Global rapeseed crush is forecast to reach a record 75.1 million tons.
