# **Oilseeds Domestic Fundamentals:**

Soybean witnessed steady to firm tone owing to bullish cues from the international palm oil market. However, weak soy meal export demand and on an estimated rise in the mustard seed production in the current season limit the upside risk in the prices.CPO at BMD ended higher due to lower than expected palm oil inventories for Jan. Market participants eye on the upcoming USDA which can give fresh directional moves to the market. Moreover, RM seed prices edged higher in the major cash market in line with soy complex. Market Arrivals - All India mustard seed arrivals surged to 1.10 lakh bags (35,000 old). Arrivals from the Rajasthan mandis were 60,000 bags. New RM seed arrivals commence in MP and Rajasthan and likely to pick up in the coming 10-15 days.

### International Oilseeds Fundamentals:

Infoma cuts its forecast for Argentina during 2013/14 to 57 million tons, down 0.5 million tons from its previous figure and raised its projection for Brazil's 2013/14 soybean harvest to 89.7 million tons, up one million tons from its previous forecast.

### **Outlook:**

Soybean (plant delivery) prices are expected to feature range-bound movement with firm-bias. The Indore (Plant Delivery) prices are expected to witness 3925-4050 levels in the near term.
