# AW AGRIWATCH

**Oilseeds Domestic Fundamentals:** Soybean (Plant delivery, Indore) edged-up on buying support while RM seed (Jaipur) eased on cautious buying followed by weakness in BMD CPO which drives the domestic RM seed market. Soybean at e-CBOT is at positive territory at 5.30 p.m. IST.

Argentina's area under soybean is likely at 19.8 million hectares in 2015/16 season, which is 1% lower than the last season. The area is estimated by Buenos Aires Grains Exchange.

However, Rosario grain exchanged had estimated 20.5 million hectares up from their previous season's estimate of 20.2 million hectares. Chinese September soybean buying is up 44.3% from the corresponding period last year to 7.26 million tonnes, the volumes is above market expectations.

International Oilseeds Fundamentals: In the US soybean crop progress report, as on 18 October, about 96% of the crop is dropping leaves which are in line with 5 year average and 94% during the corresponding period last year. Soybean harvested is reported by 77% which is up from 5 year average of 68% and up from 51% during the corresponding period last year.

Conab, the crop supply agency of Brazil's government has forecasted countries record 2015/16 soybean production between 100.1 million tonnes to 101.9 million which is higher than Conab's 2014/15 estimated outturn of 96.2 million tonnes.

**Outlook:** Soybean (plant delivery) prices are likely to feature gains on better buying near-term. The Indore (Plant Delivery) prices are expected to be in the range of 3900 – 4050 levels in the near term.
