

Oilseeds Domestic Fundamentals: Soybean (Plant delivery, Indore) and RM seed (Jaipur) extended losses on slack in buying in cash markets Monday. Weakness in Malaysian palm oil remained negative for the oils and fats market.

Brazil's soybean planting is lagging and it is below historical average primarily due to dry weather in center-west, reported AgRural, the area covered under soybean is reported at 31% compared to 42% five-year average .But the area coverage is up during the corresponding period last year which was 29%, said AgRural.

The area is estimated by Buenos Aires Grains Exchange. However, Rosario grain exchanged had estimated 20.5 million hectares up from their previous season's estimate of 20.2 million hectares.

International Oilseeds Fundamentals: In the US soybean crop progress report, as on 25 October, the soybean harvested is reported by 87% which is up from 5 year average of 80% and up from 68% during the corresponding period last year. Conab, the crop supply agency of Brazil's government has forecasted countries record 2015/16 soybean production between 100.1 million tonnes to 101.9 million which is higher than Conab's 2014/15 estimated outturn of 96.2 million tonnes.

Outlook: Soybean (plant delivery) prices are likely to feature losses on slack in buying in near-term. The Indore (Plant Delivery) prices are expected to be in the range of 3600 – 3700 levels in the near-term.
