

Oilseed Daily Fundamental Report

2 December, 2015

Oilseeds Domestic Fundamentals: Soybean (Plant delivery, Indore) and RM seed (Jaipur) posted gains on buying support in the cash market. Overnight gains in CBOT soybeans remained supportive for the market while improved demand in RM seed from solvent extractors remained positive for the seed Tuesday.

Brazil's newly planted soybean crop is hit by the rust fungus and the incidences nearly doubled compared the previous season mainly due to heavy rains in the South caused by El Nino.

About 73 incidences have been reported in southern states of Rio Grande do Sul and Parana compared to 43 incidences during the same period last year.

International Oilseeds Fundamentals: The sales of Brazil's 2015/16 soybean crop are reported up at 44% by second half of November compared to 41% in October. But the forwards sales are well above 26% a year ago followed by strong dollar which boosted the forward bookings. Brazil's soybean crop is 81% planted below last year's 85% and the 5-year average of 89%. A large area needs to be replanted due to the irregular rains in the key growing areas of Brazil at the time of planting.

Ukraine's soybean harvest is expected to increase by 30% to 4.92 million tonnes while sunflower seed production is likely to increase by 6% to 12 million tonnes, said UkrAgroConsult.

Outlook: Soybean (plant delivery) prices are likely to feature range-bound movement with weak- firm-bias on sluggish international market, in near-term. The Indore (Plant Delivery) prices are expected to be in the range of 3700–3800 levels in the near-term.
