

**Oilseeds Domestic Fundamentals:** Soybean, Indore (Plant Delivery) remained flat on steady demand while RM seed, Jaipur fell on rising new crop and toria arrivals Saturday.

Informa Economics has raised its 2016 US soybean planting forecast to 85.23 million acres from 84.537 million in December. This indicates likely record US soybean production in 2016.

**International Oilseeds Fundamentals:** Argentina has eased the soybean import policies, said the government, this is a step to boost the exports of Argentina's soy meal livestock feed and soy oil during harvesting period when one third of the processing units are idle. The measure is in addition to the latest free-market reform introduced by the newly elected government headed by the President Mauricio Macri, easing controls on farm sector. Earlier government had restricted the soybean imports from the neighboring producing countries like Brazil, Paraguay. The step is expected to negatively affect the trade volume of grain trading giants like Bunge, Cargill which have presence in these countries.

Lanworth, US crop forecaster, has projected Brazil's 2015/16 soybean production to a record 103.0 million tonnes just after Conab, the Brazil's government crop supply agency, reduced its projections citing dry weather in top soy growing belts in November and December.

**Outlook:** Soybean (plant delivery) prices are likely to feature range-bound movement, in near-term. The Indore (Plant Delivery) prices are expected to be in the range of 3700 – 3800 levels in the near-term.
