AW AGRIWATCH

Oilseeds Domestic Fundamentals: Soybean, Indore (Plant Delivery) improved while RM seed (Jaipur) extended losses on slack in buying in the cash market. Overnight gains on CBOT soybean remained supportive to the domestic soy market.

China had imported 7.76 million tonnes of soybean in July down 18% from year ago but up 2.6% from June (7.56 Mn T), reported the General Administration of Customs of China.

US oilseeds processors crushed 4.624 million tonnes of soybean during June which is down from 4.826 million processed in May. However, the figure is higher compared to 4.549 million tonnes crushed during the corresponding period last year and it is close to the market expectation of 4.626 million. USDA also said that the soy meal inventories at the end of June stood at 281,038 tonnes which is down from 343,411 tonnes in May.

Brazil's 2016/17 (Feb. – Jan.) soybean exports are estimated to ease by 1% to 52.5 million tonnes according to the report by Safras & Mercado. Safras had forecasted Brazil's 2016/17 soybean production at 103.4 million tonnes, up from 97.15 million tonnes projected in the previous season.

International Oilseeds Fundamentals FCStone has pegged Brazil's soybean exports lower by 2.4% at 53 million tonnes in 2015/16 compared to 54.32 million tonnes in 2014/15. The fall in cited due to the surge in the local prices this has consequently reduced the competitiveness in the international market.

Outlook: Soybean (plant delivery) prices are likely to feature range bound movement with weak bias in near-term. The Indore (Plant Delivery) prices are expected to be in the range of 3650 – 3750 levels in the near-term.
