AW AGRIWATCH

**Oilseeds Domestic Fundamentals:** Soybean, Indore (Plant Delivery) and RM seed (Jaipur) edged-up on supportive buying in the cash markets. Egypt's agriculture quarantine agency has reportedly rejected 15 vessels of soybean between May 2015 and June 2016 sourced from Ukraine, Brazil, Argentina and US. This is due to the higher than permitted levels of ambrosia and fungus. The volume totalled around 645,000 T. Argentine government has postponed a tax slash premeditated for next marketing year on exports of soy and its products. The country is reeling into economic slump and dependent of the fiscal revenue.

About 46% of the US soybean crop is dropping leaves which down from 50% during the corresponding period last year but above from 43% with the 5 year average. Harvesting is reported at 4% down compared to 6% during the corresponding period last year and slightly down from 5% from 5 year average. About 73% of the newly planted US soybean crop is under good to excellent conditions which is up from 63% during the same period last year, reported in the US crop progress report dated 19 Sept. 2016.

China's soybean imports during August fell by 1.2% to 7.67 million tonnes compared to7.76 million tonnes in July, reported by General Administration of Customs of China. However, the country's August vegetable oil imports stood at 550,000 tonnes which is up 22.2% from July.

International Oilseeds Fundamentals: Pro Farmer has projected US soybean production at a record 4.093 billion bushels, considering an average yield of 49.3 bushels per acre after the recent crop tour; this is above USDA's August WASDE - outlook for a 4.060 billion bushels production with an average yield of 48.9 bushels per acre.

**Outlook:** Soybean (plant delivery) prices are likely feature range bound movement in near-term. The Indore (Plant Delivery) prices are expected to be in the range of 3300 – 3400 levels in the near-term.
