

Oilseed Daily Fundamental Report 13th November, 2017

- *Oilseeds Domestic Fundamentals:* Soybean (plant delivery, Indore) witnessed positive tone amid good demand from the crushers and rapeseed-mustard (Condition, Jaipur) noticed weak tone amid weakness in overseas edible oils. Bearish monthly supply and demand report released by the USDA for the month of November added to the weak tone of the market. All India soybean arrivals in the major mandis declined to 738,500 bags compared to 741,000 bags on previous day. Further, the all India arrivals of the rapeseed-mustard declined to 150,000 bags compared to 175,000 bags on previous day.
- International Oilseeds Fundamentals: The area coverage under mustard, as on 10th November 2017, is reported down 3.54% at 37.05 lakh hectares compared to 38.41 lakh hectares at the same period last year. The area under groundnut is reported lower by 6.70% at 1.67 lakh hectares and that of sunflower is reported lower by 11.63% at 0.76 lakh hectares. The total sown area under rabi oilseeds, as on 10th November 2017, is lower compared to the previous year's level which is down by 2.85% at 40.93 lakh hectares compared to 42.13 lakh hectares during the corresponding period last year.
- The U.S. Department of Agriculture's monthly supply and demand report for the month of November forecasts U.S. soybean production at 4,425 million bushels, down 5 million bushels due to a fractionally lower yield compared to previous month's estimates. Total U.S. oilseed production for 2017/18 is projected at 132.1 MMT, down 0.1 MMT from previous month amid lower soybean and peanut production. Global soybean ending stocks for 2017/18 are forecast at 97.90 MMT up from previous month's forecast of 96.05 MMT, mostly reflecting increases for China, Argentina, and Brazil.

Outlook: Soybean (plant delivery) prices are likely feature range –bound to firm tone in near-term. The Indore (Plant Delivery) prices are expected to be in the range of 2900 – 3100 levels in the near-term.
