

Oilseed Daily Fundamental Report 16th February, 2018

Oilseeds Domestic Fundamentals: Soybean (plant delivery, Indore) and rapeseed-mustard (Condition, Jaipur) noticed weak tone amid profit –booking at higher levels. Arrivals are reported to be lower in the mandis. However market is expected to recover in the coming days amid lower availability in the domestic market and firm tone of soybean at CBOT. Dry weather in Argentina continued to remain supporting factor for the market. There could be some isolated rains, which will be not beneficial for the crop.

According to the latest survey by the Soybean Processor's Association of India (SOPA), India's soybean output in the 2017 - 18 season is likely to decline by 24 per cent to 8.35 MMT compared to previous year's estimates of 10.9 MMT. Output is lower amid flood-induced crop damage in major growing states, followed by blight disease in the plants. According to industry sources, India's total acreage is down by 5 per cent this year. SOPA also estimates India's soybean meal exports at 1.25 MMT for financial year 2017-18 compared to 2 MMT reported for the previous year.

International Oilseeds Fundamentals: According to the Rosario Grains Exchange, soybean output of Argentina in 2017 - 18 could be less than 50 MMT as prolonged drought is likely to affect yield. No significant rains are expected in the next 10-12 days, which is likely to affect the crop further. There could be some very isolated rains, which will not be beneficial for the crop.

Outlook: Soybean (plant delivery) prices are likely feature range –bound to firm tone in near-term. The Indore (Plant Delivery) prices are expected to be in the range of 3700 – 4000 levels in the near-term.
