

Oilseeds Domestic Fundamentals

- Cash oilseeds market continued to gain for second straight day over the good prospects of soymeal exports been evolving from Iran. NCDEX Soybean gained after bullish sentiments hovering over potential meal exports to Iran. Mustard however traded sideways.
- Soybean is carried by momentum and bulls are right on money. As on 17th Jan no new vessel is has been waiting for the docks for meal exports. Let's see how many is going to arrive in coming days. Till in Jan month nearly 1.3 lakh tons of soymeal has been shipped or about to ship in bulk shipment which itself is indicating y-o-y high exports for Jan month.
- With SEA production number current exports pace is capable of eating away all the exportable surplus by end of Oct-Sep MY. In 2017-18 stocks where tightening as we moved into the second half of 2017-18 MY but was not been supported by international market. Let's see how things is going to unfold post mid of Feb. In NCDEX market price sustain above 3650 level whenever it has breached it and this week closing is indicating the same. Prices can rally to 3850 in coming week.
- Even though Iran has been prospective exports market for India mainly due to the establishment of barter system, Iran continue to buy SA soybean and meal rerouted through Afghanistan. According to sources nearly 30 lakh tons of bean/meal has already arrived Iran post US sanctions.
- The only onus India has the barter system by which India is going to push basmati rice and soymeal in exchange of cude oil imported and thus Iran might try to dispose Indian rupee by buying above mentioned agri commodities.
- In MP Modified BBY will be replaced by actual BBY which is the payment of only the difference amount to the farmers over MSP. The previous govt policy of flat INR 500 payment per quintal has been replaced by new congress govt.
- NAFED has sold 89.5 thd tons of Mustard in Jan month as on 15th Jan and is the highest for the NAFED for this season in the first 15 months. The auctioned prices are at par with the market rate and thus has found string interest among crushers amidst tapering supplies in the market. Auction on 15th Jan offered prices between 3605 to 3660. Stocks as on the mentioned date is at 3.11 lakh tons with another 1 ½ months for the start of new season. In any case with the expected early of new crop NAFED stocks by end of mar-Feb MY is expected to be around 1.5 to 1.6 lakh tons. Earlier we were expecting that the stocks is expected to be above 3.5 lakh tons.
- Soybean procurement period is over except Telangana. State govt of Rajasthan, Maharashtra and Karnataka has announced the expiry of the period. As on 15th Jan just 19.77 thd tons of soybean has been procured.
- On the other hand groundnut procurement is still going on and as on 15th Jan 5.26 lakh tons of in shell groundnut has been procured. We can also see procurement window closing near soon.

Oilseeds International Fundamentals

- Chicago soybean futures was trading sideways in the early trade today.
- Weaker cash basis at the Gulf indicate China has not been looking for additional beans. Basis values in Brazil are also weaker again today as the spread between US and Brazil has collapsed. There is no USDA reports over the continued US shut down and thus we don't have weekly exports report.
- Weather is mildly supportive beans with Brazil rains light in central and eastern belt but demand is subject with basis in both US and Brazil weaker today. While longer season beans are said to be struggling due to hot and dry weather, harvest is advancing on the early beans. Mato Grosso is near 6% complete with Parana 10% complete.
- Argentina gets an opportunity to dry out a bit in the 1-5 day, but wetter conditions appear in the 6-10 and the 11-15 day outlooks. Temp in Argentina should remain favorable to crop development through the forecast period.
- Chinese officials see a likely rise in hog prices in the second half of the year and are asking farmers to increase production quickly. The Ag Ministry indicated breeding sow population was down 8.3% in December from the previous year and was down for the third month in a row. If China production drops 10% that could mean 5.8 million less head a month.
- Markets is going to remain closed over MLK Jr. Holiday. Wall Street Journal reports behind the scenes discussions may include possible tariff roll back.
- **Outlook:** Soybean (plant delivery) prices are likely feature loss in coming days. The Indore (Plant Delivery) prices are expected to start trading in the range of 3500 to 3800 in coming days. Mustard (42%) spot prices are expected to remain in between 4050 and 4150 per quintal in coming days.
