

Oilseeds Domestic Fundamentals

- Mixed trends are witnessed in soybean complex due to mixed sentiments in the market. RM seed prices remain steady due to moderate demand locally. NCDEX Soybean and RM seed prices closed with profit bookings at current level. Declined monsoon spell in major soybean producing states in the country affecting the crop condition, may further puts soybean prices under pressure.
- As per the sources, farmers in Marathwada and Vidarbha regions of Maharashtra, the main belts for cotton, Oilseeds and pulses opting for short duration crops such as Maize, Jowar, sunflower due to declined monsoon activity. Better prices and lower moisture requirement has led to many farmers preferring maize and bajra (sorghum). Both crops had traded above the Minimum Support Price (MSP) throughout last year. cultivation of bajra and maize would increase by 5 and 15 per cent this year.
- According to the weekly acreage report of Gujarat's agriculture department, Kharif acreage as on July 15 stood at 48.79 lakh ha, which is 57.57% of the three-year average of 84.76 lakh ha. However, many farmers have complained that sowing has failed and also the government's statistics show a healthy picture, but the ground reality could be drastically different as inadequate rain is on the verge of destroying crops. Farmers have sown cotton, groundnut, sesame, jowar and corn twice, but crops have failed they have urged the government to settle crop insurance at the earliest.
- As per state agricultural department of Maharashtra, at the state level 51% sowing is done, Farmers in at least 24 of the 36 districts in the state may have to go in for re-sowing if the dry spell continues beyond July 22. These districts, mainly from Marathwada, Vidarbha and North Maharashtra, have received scanty rainfall. In most of them, sowing has been below 30% while in some, farmers have yet to sow. State has put in place a contingency plan: one lakh quintal of soybean seeds are ready to be distributed in Vidarbha.
