#### Oilseeds Domestic Fundamentals

- Steady to weak trends are witnessed in soybean complex due declined demand from local crushers and south based traders.RM seed prices showed trends due to poor demand in the market. NCDEX Soybean and RM seed prices rose up due to speculation. Declined monsoon spell in major soybean producing states in the country affecting the crop condition, may further puts soybean prices under pressure.
- India's edible oil imports are likely to rise 7.3 per cent in 2019-20 to a record high, as weak monsoon rains curtail yields of summer-sown oilseeds such as soybeans and groundnut. India to import as much as 16.1 million tonnes of edible oils in the new marketing year starting November 1, which is up from this year's estimated 15 million tonnes.
- According to recent Ministry report, India has covered total oil seeds kharif sowing area as on 19<sup>th</sup>July 2019 about 110.54 lakh Ha. has been reported compared to normal corresponding week (123.54 lakh Ha.) from previous year. Thus 12.91 lakh. Ha less area has been covered compared to normal corresponding week in previous year. - As per IMD, India has received 16% below average rain since the monsoon season began on June 1. The key groundnut growing areas in western India also received below average rains. The country is waiting for a good spell of rains for saving the crops already sown and to sow areas that have not received any rainfall so far. Farmers in Marathwada and Vidarbha regions of Maharashtra, the main belts for cotton, Oilseeds and pulses opting for short duration crops such as Maize, Jowar, sunflower due to declined monsoon activity. Better prices and lower moisture requirement has led to many farmers preferring maize and bajra (sorghum). Both crops had traded above the Minimum Support Price (MSP) throughout last year. cultivation of bajra and maize would increase by 5 and 15 per cent this year.
- According to the weekly acreage report of Gujarat's agriculture department, Kharif acreage as on July 15 stood at 48.79 lakh ha, which is 57.57% of the three-year average of 84.76 lakh ha. However, many farmers have complained that sowing has failed and also the government's statistics show a healthy picture, but the ground reality could be drastically different as inadequate rain is on the verge of destroying crops. Farmers have sown cotton, groundnut, sesame, jowar and corn twice, but crops have failed they have urged the government to settle crop insurance at the earliest.
