

Oilseeds Domestic Fundamentals

- Mixed trends are witnessed in Oilseed complex due to mixed sentiments in the market. NCDEX Soybean and RM seed prices declined due to speculators selling pressure. Declined monsoon spell in major soybean producing states in the country affecting the crop condition, may further puts soybean prices under pressure.
- According to recent Ministry report, India has covered total oil seeds kharif sowing area as on 26th July 2019 about 133.66 lakh Ha. has been reported compared to normal corresponding week (140.92 lakh Ha.) from previous year. Thus 7.26 lakh. Ha less area has been covered compared to normal corresponding week in previous year. Higher area during the week is reported from the state of Maharashtra (3.00 lakh Ha.), Rajasthan (0.42 lakh Ha.), Bihar (0.29 lakh ha), Jharkhand (0.10 lakh ha), Uttarakhand (0.02 lakh Ha). Less area during the week is reported from the state of Madhya Pradesh (4.78 lakh ha), Gujarat (0.62 lakh Ha.) Karnataka (2.77 lakh ha.), Chhattisgarh (0.79 lakh Ha), Telangana (0.68 lakh ha), Odisha (0.20 lakh ha), AP (2.681 lakh. ha.) UP (0.15 lakh ha) etc.
- As per IMD, India's monsoon rains were 35% below average in the week ending July 24, after receiving 20% less rainfall in the prior week, raising concerns over the output of summer-sown crops. Overall, India has received 17% less rain than average since the monsoon season began on June 1, but in some states such as Gujarat, the biggest producer of cotton and groundnut, the rainfall deficit is as high as 42%. However, India is likely to receive above average rainfall in the coming two weeks, which will be well distributed across the country.
- India's edible oil imports are likely to rise 7.3 per cent in 2019-20 to a record high, as weak monsoon rains curtail yields of summer-sown oilseeds such as soybeans and groundnut. India to import as much as 16.1 million tonnes of edible oils in the new marketing year starting November 1, which is up from this year's estimated 15 million tonnes.
- According to the weekly acreage report of Gujarat's agriculture department, Kharif acreage as on July 15 stood at 48.79 lakh ha, which is 57.57% of the three-year average of 84.76 lakh ha. However, many farmers have complained that sowing has failed and also the government's statistics show a healthy picture, but the ground reality could be drastically different as inadequate rain is on the verge of destroying crops. Farmers have sown cotton, groundnut, sesame, jowar and corn twice, but crops have failed they have urged the government to settle crop insurance at the earliest.

Oilseeds International Fundamentals

- CBOT Soybean future settled lower on Thursday due to declined weekly export sales.
- As per the sources, china government had given a tariff exemption to 5 companies to purchase up to 3 million MT of US soybean.
- As per latest US weekly crop condition, soybean crop held steady at 54% rated good to excellent. Eight states indicated that the soybean condition improved last week. Most of the improvements were found in the central and southern Corn Belt while most of the declines were found in the eastern and northern Corn Belt as well as the Delta.
- As per USDA, During this week (July 12 to July 18) US Net sales reductions of 78,200 MT of 2018/2019 resulting in increases for unknown destinations (57,700 MT), South Korea (26,000 MT, including 25,000 MT switched from unknown destinations), Indonesia (21,800 MT, including decreases of 2,100 MT), Malaysia (7,200 MT), and Vietnam (2,400 MT), were more than offset by reductions for China (148,400 MT), Taiwan (27,200 MT), and Canada (18,400 MT). For 2019/2020, net sales of 223,700 MT were primarily for Mexico (95,000 MT), Taiwan (87,700 MT), and unknown destinations (30,000 MT), were partially offset by reductions for Canada (1,400 MT). Exports of 637,500 MT were down 30 percent from the previous week and 17 percent from the prior 4-week average. The destinations were primarily to China (381,600 MT), Mexico (105,300 MT), Taiwan (25,300 MT), South Korea (25,000 MT), and Indonesia (22,300 MT).
- As per the sources, Ukraine harvested Oilseed crop up to 2.73 million tonnes as on 23rd July 2019 higher against 2.25 million tonnes compared to last year. Moreover, rapeseed crop could rise to 3.58 million tonnes from 2.84 million tonnes in 2018.
- As per NOPA, U.S. soybean crushing likely declined for a third straight month in June by 154 million bushels. Crush forecasts for June ranged from 147.937 million to 164.500 million bushels, with a median estimate of 152.200 million bushels which is less from the May crush of 154.796 million bushels and a crush of 159.228 million bushels in June 2018.
- Outlook:** Mixed trends are witnessed in soybean complex today due to mixed sentiments in the market. The Indore (Plant Delivery) prices are expected to trade in the range of 3600 to 3650 in coming day. Mustard (42%) spot prices are likely to trade in the range of 4090 and 4110 per quintal ahead of a day.
