

Oilseeds Domestic Fundamental

Mixed trend are extended in oilseeds complex today amid mixed sentiments in the market. Farmers and traders hold total 25 to 35 lakh tonnes of soybean seed's stocks and likely to release in March end or April 2020. Soybean price may decline further as seasonal demand is over and poultry demand for soymeal is also less. There is no margin in crushing soybean at current level due to weak demand of soy oil. New mustard crop will commence to arrive in physical market in mid of Feb month which will weigh on mustard seed prices. Traders expect 20% higher mustard crop of this season in Rajasthan belt. Standing mustard crops in the fields are in good condition so far. NCDEX Soybean Feb contract increased on buying activities however Mustard Feb contract closed lower side after selling pressures.

According to farm ministry recent data, India is likely to grow mustard crop at 9.34 million tonnes for 2019/20 season which is unchanged from last year record. Overall crop condition is good and likely to support mustard production to increase. However, hailstorm in early Jan month 2020 have affected standing mustard crops in some parts of northern and western part of India which may cause the stem rot disease and leave the plant wilted. In Rajasthan, western Uttar Pradesh and southern Haryana, white rust and stem rot diseases were reported which may curb any major rise in crop size. It pegged 6.2 million hectares of mustard sowing area for this season unchanged from last season. It expects total 2.7 million hectares of sowing area in Rajasthan. However, farmers may switch mustard area to wheat in MP, Haryana, Uttar Pradesh and West Bengal. Mustard yield for 2019-20 is likely to stay unchanged at 1.49 tonnes per hac as compared to previous year. While, yield may increase to 1.9 tonnes per hac in some parts of eastern UP.

As per recent released data of Ministry, the total area under Oilseeds is reported lower by 0.07 lakh hectares to 80.29 lakh hectares as on 31st Jan 2020 against 80.36 lakh hectares in the previous year in the corresponding period of time. There is a drop-in sowing of Mustard seed to 69.51 lakh hectares lower by 0.24 lakh hac. against 69.76 lakh hectares in last year. Sunflower has been planted on 1.04 lakh hectares lower against 1.13 lakh hectares in last year. Sesame has been planted on 0.56 lakh hectares lower from last year i.e.0.71 lakh hac. However, total covering area of groundnut stood at 4.76 lakh hectares higher against 4.59 lakh hectares in last year. Safflower has been planted on 0.63 lakh hectares higher from last year record i.e.0.43 lakh hectares. Linseed has been planted on 3.46 lakh hectares higher against 3.44 lakh hectares in last year.

Agriwatch estimates 8.74 million tonnes of Soybean output in India for 2019-20 season which is sharply down by 42.73% against 12.59 million tonnes in 2018-19 despite covering 1.02% higher soybean area in this year due to bad weather condition. Rains in MP came when harvest has ongoing and crop was damaged to the extent of 20% in the Malwa region. Damage was 30-35% in Neemuch, Mandsaurm, Nagada and Janora and 10-15% in Indore, Dewas and Ujjain. Soybean seed was damaged and quality of soybean was inferior. The size of seed was small and quality of seed was bad. Some crop was damaged while drying in some areas. Rains came in Maharashtra when harvest was in progress. Crop damage is 5% of the total while 10% of area was affected in which damage was 50%. Waterlogging was the main reason for damage which led to seed damage and bad quality of the seed due to fungus. Vidharba reported higher damage with losses as high as 50% of the crop damaged in 20% of the area. Akola reported major damage. Latur, Solapur and Beed reported 10% damage while Parbani, Nanded and Hingoli reported 15% damage to the crop.

Oilseeds International Fundamentals

CBOT futures prices closed higher side in expectation of good buying activities of China.

As per recent government data, China bought 69,009 tons of soybean in the week ended Feb 6, 2020 which is lower from last month.

As per Agroconsult, Brazil is likely to harvest 126.3 million tons of soybean in 2019-20 higher against 124.3 in its prior forecast. It forecast soybean exports of Brazil at 73 million tonnes for this season lower against 76-78 from its prior forecast. Brazil may export total 54 million tonnes of soybean in 2020 lower against 58 million tonnes in 2019.

Outlook: The Indore (Plant Delivery) prices are expected to trade in the range of 3950 to 4000 in coming day. Mustard (42%) spot prices are likely to trade in the range of 4180 and 4220 per quintal ahead of a day.
