

**Oilseeds Domestic Fundamental**

Mixed trend are seen in Oilseeds complex today on mixed sentiments in the market today. New crops of Mustard seed have started to arrive in mandies however in a slow pace and likely to report good quantity after mid of March 2020. Heavy rainfall in Jan month delayed harvesting pace of mustard seed of this season. Mustard seed prices in spot markets is likely to increase ahead of Holi Festival. Farmers and traders hold total 20 to 30 lakh tons of soybean seed and likely to release in March end or April 2020. NCDEX soybean and RM seed March contract declined on selling pressures today.

As per second advanced estimates of ministry, India is likely to grow 22.55% higher groundnut seed at 82.44 lakh tonnes in 2019-20 compared to 67.27 lakh tonnes in 2018-19. India may get 69.49 lakh tones of kharif crop of groundnut which is higher from 53.87 lakh tonnes however 3.3% lower Rabi season groundnut crop at 12.95 lakh tonnes in 2019-20 against last season. Mustard output of Rabi season is expected to stay at 91.13 lakh tonnes in 2019-20 which is 1.54% lower from 92.56 lakh tonnes in last year. Soybean crop size for kharif season is estimated at 136.28 lakh tonnes higher by 2.71% against 132.68 lakh tonnes in 2018-19. Total oilseeds crop size is placed at 341.88 lakh tonnes in 2019-20 higher against 315.22 in last year supported by higher kharif season crop size.

Farmers have started to bring new mustard early sown crop at few districts of Rajasthan, UP, MP and Gujarat. However, the new harvested mustard crops contained 48 to 52% moisture which is higher than 10 to 12% in normal condition. Farmers have covered total 6.9 million hac. Of mustard seed in 2019-20 season lower by 0.4% against last year record as some parts of area has been shifted to Wheat crop. We expect lower crop size in 2020-21 on account of poor yield against last year record. In 2019-20, we have estimated RM Seeds crop size at 7.9 MMT higher from 2018-19 due to higher sown area and good yield.

According to farm ministry recent data, India is likely to grow mustard crop at 9.34 million tonnes for 2019/20 season which is unchanged from last year record. Overall crop condition is good and likely to support mustard production to increase. However, hailstorm in early Jan month 2020 have affected standing mustard crops in some parts of northern and western part of India which may cause the stem rot disease and leave the plant wilted. In Rajasthan, western Uttar Pradesh and southern Haryana, white rust and stem rot diseases were reported which may curb any major rise in crop size. It pegged 6.2 million hectares of mustard sowing area for this season unchanged from last season. It expects total 2.7 million hectares of sowing area in Rajasthan. However, farmers may switch mustard area to wheat in MP, Haryana, Uttar Pradesh and West Bengal. Mustard yield for 2019-20 is likely to stay unchanged at 1.49 tonnes per hac. as compared to previous year. While, yield may increase to 1.9 tonnes per hac. in some parts of eastern UP.

Oilseeds International Fundamentals

CBOT futures prices declined after weak exports sales data of USDA for this week.

As per sources, Argentina may grow higher soybean crop at 54.5 million tonnes in 2019-20 compared to its previous forecast i.e. 53.1 million tonnes on account of good rainfall.

As per IGC (International Grain Council), Global soybean output for 2019-20 may decline by 5 million tonne to 345 million tonnes due to slight shortfall in U.S Soybean output. In 2020-21, U.S. may cover 4% higher soybean planting area.

As per USDA report, U.S. is likely to plant 11.69% higher Soybean at 85 million acres in 2020 higher from 76.1 million acres in 2019.

Outlook: The Indore (Plant Delivery) prices are expected to trade in the range of 3750 to 3880 in coming day. Mustard (42%) spot prices are likely to trade in the range of 4200 and 4230 per quintal ahead of a day.
