

Oilseeds Domestic Fundamental

Oilseeds prices traded steady to weak tone today at few trading centers. However, major trading activities are remain absent at various markets due to lock down in India against Coronavirus fights. As on 13th April 2020, total 9240 cases of coronavirus have been identified in India including 331 death cases and 1096 recovered cases. Crushing of oilseeds has been re-started now however, millers are suffering from lack of labors, transportations issues and un-availability of raw materials on account of lock down. India will be lock down until 14th April 2020. However, rising confirmed cases of coronavirus are remain serious concern for India as a result lock down period may be extended for two more weeks to control the spreading of coronavirus. However, there will be a little relief in agriculture and supply chain division.

Farmers have completed mustard crop harvesting in India. Currently, farmers are not able to sell huge quantity in mandies due to lock down as a result storing in a local places and houses. Heavy rainfall in March month may cause the stem rot disease and leave the plant wilted which may reduce 10 to 15% yield size in UP compared to last season. Traders expect mustard crop size between 68 to 70 lakh tonnes for 2020-21 due to low sowing area and poor yield size.

Agriwatch expects 7.21 million tonnes of Mustard crop for 2021-20 which 8.76% lower from 7.90 million tonnes as estimated for 2019-20. Yield size may decline 8.5% to 1036.88 Kg/Hac. against 1133 Kg/Hac in 2019-20 due to non-seasonal rainfall in Jan 2020 and March 2020. India received 46% excess rainfall during 1st March 2020 to 1st April 2020 compared to Normal rainfall which may damage seed quality. Heavy Rainfall and hailstorm in early Jan month 2020 have affected standing mustard crops in Rajasthan, Western Uttar Pradesh and Southern Haryana states of India as a result the stem rot and white rust disease are seen at growth stage. Area of India is reported 0.29% lower to 6.95 million hectares compared to 6.97 million hectares in 2019-20 as mustard area have shifted to Wheat, garlic and Barley crop in some growing belt of India.

Sopa has revised Soybean Kharif production for 2019 from 89.94 lakh tonnes to 93.06 lakh tonnes after its recent field survey in Maharashtra, Madhya Pradesh and Rajasthan states. The revision is only for Maharashtra from 36.295 lakh tonne to 39.416 lakh tonne as sowing area stood higher side at 37.36 lakh ha. in 2019 against 36.39 lakh ha. in 2018. India may harvest 14.85 per cent lower Soybean crop at 93.06 lakh tonnes in 2019 against 109.3 lakh tonnes in 2018. The major Soybean producing states like Gujarat, Karnataka, Madhya Pradesh may harvest lower Soya crop by 30 per cent to 0.86 lakh tonnes, 7.1 per cent to 2.69 lakh tonnes,31.1 per cent to 40.10 lakh tonnes respectively against last year record. Sopa has increased soymeal consumption at 50 lakh tones higher from 47.5 lakh tonnes from its earlier estimates.

Oilseeds International Fundamentals

CBOT prices traded lower side amid selling pressures.

As per USDA recent released report, U.S. Soybean production for 2019/20 is estimated unchanged at 96.84 million tons in April 2020. The exports has been declined by 1.36 million tonnes to 48.30 million tonnes in its April month report from 49.66 million tonnes in last month however higher from 47.56 million tonnes in 2018-19. U.S crushing is kept higher side at 57.83 million tonnes in April 2020 against 57.28 million tonnes in March month and also from 56.93 million tonnes in last year. Ending stocks of the country is expected to be higher at 13.07 million tonnes in Apr. month review against 11.55 million tonnes in last month however lower from 24.74 million tonnes in 2018/19.

Outlook: No major trading activities until 14th April 2020 due to lock down condition in India.
