

# Oilseed Daily Fundamental Report 04th May, 2020

Oilseeds Domestic Fundamentals: Most of the key oilseeds' cash markets remained closed due to the nationwide lockdown amidst COVID-19. No trade activity was reported in the benchmark soybean Indore market and other bean markets of Rajasthan like Kota, Bundi and Baran. Rapeseed-Mustard (Jaipur, condition) posted gains of supportive buying by the stockists and the millers.

In the weekly USDA crop progress report released on 27 April 2020; Soybeans planting is reported at 27% up 12% from same period last year and 20% from 5 year average. The CBOT soybeans posted gains previous day on expectations China will step up to oilseeds purchases, China is planning purchase order of 10 mn tonnes of soybean in coming days.

Brazil's soybean shipment volume during 1Q20 was the highest on record, up by 13.5% from 1Q19. About 75% (or 13.3 million tonnes) of the Brazilian exports during the first quarter of 2020 was headed to China.

The large Brazilian harvest this season along with the significant depreciation of the local currency Real against the US dollar (the Brazilian real lost almost one third of its value since January), this eventually made Brazilian soybeans cheaper – which in turn triggered more buying from Chinese crushers.

International Oilseeds Fundamentals: Rosario Grains Exchange have to reduce Argentine soybean crop estimates 50.5 million tonnes from its previous forecast of 51.5 million tonnes. This was after soybean crop was damaged by pockets of dry, hot weather in March, when harvesting was just hitting the ground.

**Outlook:** Soybean (plant delivery, Nagpur) prices are likely witness range bound movement with weak-bias in near-term. The Nagpur (Plant Delivery) prices are expected to be in the range of 4050 – 4100 levels in the near-term.
