

**Oilseeds Domestic Fundamentals:** Steady to firm tone are seen in Oilseeds physical markets amid slow pace of arrivals today, Saturday. In MP, soybean standing crops may damage on account of diseases due to heavy rainfall mainly in the area of Indore, Dewas, Ujjain, Dhar, Sehore, Harda, Shajapur, Mandla. Sopa has reported 10 to 12% soybean crop damage so far after its survey in the field which may support prices to rise.

In the last official progressive Kharif planting report, India's area under oilseeds coverage is reported up by 14.1%. This year the country's soybean area is up, as expected, and area coverage under soybean is 120.0 lha, up over 8% from 111.49 lha normal area. The standing soybean crop is in the good condition across the key growing regions.

**International Oilseeds Fundamentals:** Conab has forecast Brazil's 2020/21 soybean crop output at 133.5 million tonnes vs 120.936 million tonnes estimated for 2019/20 on expected rise in the planted area under the crop by 1% to around 38 million hectares.

China has bought 10.09 million tonnes of soybean in July'20. Of which about 8.81 million tonnes is imported from Brazil alone, mainly due to the competitive price offer on bumper soybean production in Brazil, this season, data from the General Administration of Customs showed.

The purchases from Brazil is up 27% from 6.42 million tonnes in July 2019, but it is lower than the record 10.51 million tonnes imported by China in June'20.

**Outlook:** Soybean (plant delivery, Indore) prices are likely to witness gain on hope of good demand in near-term. The Indore (Plant Delivery) prices are expected to be in the range of 3980 – 4050 levels in the near-term.
