

Oilseeds Domestic Fundamentals: Steady to weak tone are witnessed in Oilseed markets after heavy supplies in the market, today Saturday. The new crop soybean and groundnut supplies are gradually improving with the harvesting picking up the pace. The soybean fundamentals continued to remain weak on higher production estimates, slack in local and overseas demand for soymeal of Indian origin and improved soybean imports. All this have hurt the crush margin in soybean.

In the progressive official Kharif oilseeds planting report dated 18th September 2020, by the Ministry of Agriculture, the total coverage area under Kharif oilseeds is reported at 196.77 lakh hectares, an increase by 10.5% from 178.11 lakh ha in the corresponding period of last year. Of the major oilseeds, soybean sowing is reported up by 7% at 121.21 lha compared to 113.41 lha during the corresponding period of last year, groundnut at 50.95 lha vs 39.13 lha, sesamum 14.01 lha vs 13.64 lha, castor seed at 7.74 lha vs 9.10 lha and niger at 1.63 lha vs 1.84 lha, during the same period last year. We feel country's final area under oilseeds to be above normal by 7-8% this season.

International Oilseeds Fundamentals: US soybean harvesting is progressing well and yields are better than expected.

Argentina's 2020/21 soybean output is pegged at 50 million tonnes by Rosario Grain Exchange. The country harvested 50.7 million tonnes in 2019/20. The Buenos Aires Grains Exchange soy crop has estimated at 46.5 million tonnes vs 49.6 million tonnes last season. And increase the area under bean by by 0.6% this year vs 17.3 million hectares.

Outlook: Soybean (plant delivery, Indore) prices are likely to feature range-bound movement with weak bias. The Indore (Plant Delivery) prices are expected to be in the range of 3700 – 3750 levels in the near-term.
