

**Oilseeds Domestic Fundamentals:** Firm tone are seen in Oilseeds complex today despite heavy supplies today, Friday. However, forecast of higher soybean production for India this season may curb any major gain in soybean prices in future. The Government of India has increased the MSP of rapeseed-mustard for 2021-22 crop by Rs.225, well ahead the season lending support to the seed prices at higher levels.

In the final official progressive kharif planting report, India's area under oilseeds coverage is reported up by 10.5%. This year area coverage under soybean is 121.21 lha, up by 7% from the 113.41 lha normal area. Agriwatch has pegged India's 2020/21 soybean output up 38% from previous season after increase in the sown area under the bean.

**International Oilseeds Fundamentals:** According to Agribusiness Consultancy Datagro, Brazilian soybean farmers have sold 50 percent of crop, around 65 MT as on 2 October. The sowing for new crop will start this month amid dry weather. Brazil saw a record in sales almost twice the historical average sales of soybeans; which is 26.7 percent of the estimated harvest for early October.

Britain's farming ministry forecast this year's rapeseed harvest at 1.07 million tons, down 39 percent from previous season. Lower production was mainly drive due to decrease in planted area by 27 percent as many farmers switch to spring planted crops due to wet weather during autumn of 2019.

**Outlook:** Soybean (plant delivery, Indore) prices are likely to feature range-bound movement with firm bias. The Indore (Plant Delivery) prices are expected to be in the range of 3950 – 4020 levels in the near-term.
