

**Oilseeds Domestic Fundamentals:** All the key oilseeds' cash market yards remained closed for festivities - Diwali. The India's rapeseed-mustard planting is underway, in the last official planting report the planting under the seed is reported at 31.15 lakh hectares against 31.17 lakh hectares during the same period last year. We expect India's area under rapeseed-mustard to increase this year after the seed prices sharply rose this year. India's 2019-20 area under rapeseed-mustard stood at 69.51 lakh hectares. Overall, rapeseed-mustard sentiments are still strong on better demand to cater improved rapeseed-mustard oil demand followed by COVID and winter rapeseed oil demand.

USDA attache has projected China's 2020/21 soybean imports at 95 million tonnes which is lower than 98.5 million tonnes imported in 2019/20 by the country. The reason cited is due to the higher beginning stocks in the new marketing season following a buying spree in 2019/20.

Brazilian farmers planted around 1 million hectares of soybeans per day during the last week to catch up planting delays in soybean, consultancy AgRural said in a report last week. AgRural said soybean planting in Brazil have advanced to 42% by Oct. 29 compared to 23% in a week ago. The current planting figures are close to the historical average of 44%.

**International Oilseeds Fundamentals:** AgRural has estimated Brazil's 2020/21 soybean crop at 132 million tonnes, if realised, it will be record production. In the October'20 report, the USDA has slashed US 2020/21 soybean production to 116.1 million tonnes from 117.3 million tonnes forecast in September'20 report. US soybean exports may surge to 46-48 Mn T in Sept/Feb 2020/21. Huge exports to China will tighten supplies for the rest of the world.

**Outlook:** Soybean (plant delivery, Indore) prices are likely to feature range-bound movement with weak bias on increasing arrivals in near-term. The Indore (Plant Delivery) prices are expected to be in the range of 4350 – 4450 levels in the near-term.
