

Oilseeds Domestic Fundamentals: The domestic soybean and rapeseed-mustard fell on outbreak of bird flu and expected bigger mustard crop. The confirmed reports of bird flu in the states of Delhi, Himachal Pradesh, Haryana, UP, Uttarakhand, Rajasthan, Madhya Pradesh, Gujarat, Maharashtra and Kerala will eventually hit the soybean demand from the crushers. India's overall export of oilmeals during April to November 2020 is also reported up by +12% at 19,48,699 metric tonnes compared to 17,34,875 metric tonnes during the same period last year. In the last official planting report the planting under the seed rapeseed-mustard sowing is reported up by 7% at 73.25 lha compared to 68.64 lha during the corresponding period of last year. India's 2019-20 acreage under rapeseed-mustard stood at 69.51 lakh hectares.

US soybean exports to all destinations in the first quarter of the 2020-21 marketing year, which commenced on 1st September totaled a record 29.8 million tonnes, 18% more than the previous high marked in 2016.

International Oilseeds Fundamentals: In the January'21 report, the USDA has lowered US 2020/21 soybean production to 112.5 million tonnes compared to 113.5 million tonnes previously. It has kept Brazil's soybean production unchanged at 133.0 million tonnes. Similarly for India, the estimates are unchanged at 10.5 million tonnes from previous month. However, it has slashed the Argentina's 2020/21 soybean production to 48.0 million tonnes from 50.0 million tonnes last month. The global 2020/21 soybean production is estimated at 361.0 million tonnes vs 362.1 million tonnes in the last report by USDA. World soymeal exports estimates are slightly down at 62.81 million tonnes vs 62.84 million tonnes for 2020/21.

Outlook: Soybean (plant delivery, Indore) prices are likely to feature range-bound movement with weak bias on outbreak of bird flu in several Indian states, in near-term. The Indore (Plant Delivery) prices are expected to be in the range of 4,600 – 4,700 levels in the near-term.
