

Oilseeds Domestic Fundamentals: Soybean mostly witnessed steady tone on need based buying while rapeseed-mustard featured mixed trend on various factors on varied reasons in the cash market. The confirmed reports of bird flu in the states of Delhi, Himachal Pradesh, Haryana, UP, Uttarakhand, Rajasthan, Madhya Pradesh, Gujarat, Maharashtra and Kerala have eventually hit the soybean demand from the crushers and this could continue for a short-term. In the last official planting report the planting under the seed rapeseed-mustard sowing is reported up by 7% at 73.25 lha compared to 68.64 lha during the corresponding period of last year. India's 2019-20 acreage under rapeseed-mustard stood at 69.51 lakh hectares.

The monthly US soybean crush surged to the second highest monthly level on record in December 2020, marking the busiest year of soybean crush ever for the industry, according to data published by the National Oilseed Processors Association (NOPA). NOPA members crushed 183.159 million bushels of soybean during December 2020, up from 181.018 million bushels in November and 174.812 million bushels in December 2019.

International Oilseeds Fundamentals: In the January'21 report, the USDA has lowered US 2020/21 soybean production to 112.5 million tonnes compared to 113.5 million tonnes previously. It has kept Brazil's soybean production unchanged at 133.0 million tonnes. Similarly for India, the estimates are unchanged at 10.5 million tonnes from previous month. However, it has slashed the Argentina's 2020/21 soybean production to 48.0 million tonnes from 50.0 million tonnes last month. The global 2020/21 soybean production is estimated at 361.0 million tonnes vs 362.1 million tonnes in the last report by USDA. World soymeal exports estimates are slightly down at 62.81 million tonnes vs 62.84 million tonnes for 2020/21.

Outlook: Soybean (plant delivery, Indore) prices are likely to feature range-bound movement with weak bias on outbreak of bird flu in several Indian states, in near-term. The Indore (Plant Delivery) prices are expected to be in the range of 4,600 – 4,700 levels in the near-term.
