# Oilseed Daily Fundamental Report 02 March, 2021

**Oilseeds Domestic Fundamentals:** Soybean mostly witnessed firm tone on better demand from crushers, while rapeseed-mustard declined on mounting new crop arrival pressure of the seed. The rapeseed-mustard harvesting is underway in key growing regions of Uttar Pradesh and Rajasthan and the arrivals are expected to peak by mid-March.

US soybean registered their second-largest monthly crush on record in January 2021, according to data released by the National Oilseed Processors Association (NOPA). NOPA members have crushed 184.654 million bushels of soybeans in January 2021, up from 183.159 million bushels in December and 176.940 million bushels in January 2020. It was the biggest-ever January crush and the second largest crush in volume for any month, behind only October 2020.

International Oilseeds Fundamentals: In the February'21 report, the USDA has kept US 2020/21 soybean unchanged at 112.5 million tonnes compared to previous month. It has kept Brazil's soybean production unchanged at 133.0 million tonnes. Similarly for India and Argentina the estimates are kept unchanged at 10.5 million tonnes and 48.0 million tonnes respectively.

The global 2020/21 soybean production is also kept unchanged at 361.0 million tonnes compared to the previous month in the last report by USDA. World soymeal production is estimated slightly up at 252.9 million tonnes vs 252.8 million tonnes for 2020/21.

**Outlook:** Soybean (plant delivery, Indore) prices are likely to feature range-bound movement with firm bias on better soymeal export sales and strong international soy complex. The Indore (Plant Delivery) prices are expected to be in the range of 52,00 – 5,250 levels in the near-term.
