

**Oilseeds Domestic Fundamentals:** Soybean prices closed higher side at Indore center after weak supplies today. However, Rapeseed-mustard declined at Jaipur today amid heavy supplies. As per recent USDA report, Soybean production in the world is likely to increase by 6% to 386 million tonnes in next season (September- 2021- August 2020) in expectation of higher crop size in US and India. Total crop size in India may stand higher by 750,000 tonnes to 11.2 Million tonnes against 10.45 Million tonnes in this season. Higher soybean prices in this season will encourage farmers in India to cover higher soybean area.

**International Oilseeds Fundamentals:** 2020-21 Argentina's 33 percent soy crop has been harvested compared to 68 percent last year and 56 percent on average. According to the Buenos Aires Grain Exchange, the nationwide average soybean yield is 3,030 kg/ha (45.1 bushel/acre), which is unchanged from last week. The yields are ranging from 1,670 kg/ha to 3,250 kg/ha (24.8 bushel/acre to 48.4 bushel/acre). The Buenos Aires Grain Exchange left their soybean estimate unchanged at 43.0 million tons. Soybeans were rated 30% poor/very poor, 61% fair, and 9% good/excellent as of late last week. The good/excellent percentage was unchanged compared to the prior week.

US soybean planting, as on May 10, 2021, stood at 42% up from 36% same period last year and also up from 5-year average of 22%. Further, the US soybean emerged by 10% up from 6% same period last season and also up from 4% from 5-year average of 4%.

**Outlook:** Soybean (plant delivery, Indore) prices are likely to feature weak tone on correction after prices rallied in recent weeks. However, the prices good soymeal export sales and strong international soy complex will limit the losses. The prices are expected to be in the range of 7,000 – 7,200/Qtl levels in the near-term.
