

Oilseeds Domestic Fundamentals: Soybean Indore plant prices closed steady amid steady supply as compared to previous day in Madhya Pradesh. However, In Jaipur, RM seed also went up amid tight supply.

The government has sent a proposal to the Center to reduce the germination capacity of soybean seeds from 70 percent to 60 percent. The area under soybean planting is likely to increase by 5-7 Percent across the country this kharif season despite speculation in the market over the shortage of certified seeds. Farmers, however, are hoping for a revival of the monsoon to ensure a good crop, D N Pathak, executive director, Soybean Processors Association of India (SOPA) said. Pathak also said that the area under soybean cultivation will definitely increase in Maharashtra and Rajasthan but is likely to go down to some extent in Madhya Pradesh (MP).

July soybean shipments are expected to drop on declining Brazilian shipments since the bulk of the country's harvest has been collected. Soybeans out of the United States typically dominate the market in the fourth quarter of the year as they are harvested in September and October.

Global oilseed production is raised 2.5 million tons to 635.4 million, with higher sunflower seed, rapeseed, cottonseed, and peanuts partly offset by lower soybean output. Russian sunflower seed production is increased 2.0 million tons to 16.5 million, mainly on higher area shown in government planting progress reports

World 2021/22 soybean ending stocks came in at 94.49 million tonnes, above the average expectation of 92.60 million (range 91.20-93.50 million) and up from 92.55 million last month as higher stocks for Brazil and Argentina are partly offset by lower Chinese stocks. The USDA revised its estimates for China's soybean imports, with the current 2020-21 season easing 2 million metric tons to 98 million and the upcoming season by 1 million to 102 million metric tons.

Canadian canola production is lowered from 20.5 Mmt to 20.2 Mmt as early-season drought conditions impact yields and offset an increase to area, However Chinese Rapeseed production increased 13.8 Mmt to 14 Mmt.

Exports for Brazil and Argentina for 2020/21 are reduced as high prices lead to lower shipments to China. China's imports are reduced 2 million tons to 98 million and 1 million tons to 102 million for 2020/21 and 2021/22, respectively.

Officials in Argentina's have ordered obligatory talks amid protesting port workers and companies to try and end a ports obstruction that is preventing grain shipments, Workers represented by the UOCRA union claim that construction companies serving agro-export companies pay higher wages at the port facilities. Argentina is the world's top exporter of soybean meal and a major international soybean.

The Argentina government approved a measure allowing a reduction in the amount of soy-based biofuel to be mixed into diesel. The new law will likely show a minimum use of biodiesel of 5%, and could drop to 3%, from a 10% blend previous. Lowering the blend rate is likely to spark a jump in soybean oil exports.

As of 19th July, the US soybean condition for week ending 19 July stood at 11% Excellent, 49% good, 29% fair, 8% poor and 3% Very poor.

Canola futures soared recent week because of heatwave looked to affect harvest scenario for canola in Canada. High temperature forecast in coming weeks may cause the canola flowers to drop prematurely, lead to drop in yield. Canadian farmers planted an estimated 22.5 million acres of canola for the 2021-22 crop year, the highest since 2018. This is up from the April forecast of 21.5 million acres and up 8.2% from last year.

Outlook: Soybean (plant delivery, Indore) prices are likely to feature firm tone amid good demand by miller and crusher, however arrival has gone down at all trading markets. The prices are expected to be in the range of 8,000 – 8,500/qrtl. levels in the near-term.
