 2022 which was provided.

2022 which was previously extended till 30th June 22. Exceptions have been given for exporters and importers. This will impact the prices in long term. The quantity specified are-

Edible oilseeds	100 Quintals	2000 Quintals	-		90 days production of edible oils, as per daily input prodcution capacity

- India imports usually 1.75-2 Lakh tonnes of sunflower oil per month from Russia and Ukraine. The Russia-Ukraine conflict has disturbed Sunflower oil supply. Additionally, Indonesia announced to increase limit of domestic sell from 20% to 30% on 9th March. Tight domestic edible oil supply pushed higher Soy prices too. However, In the Upcoming week, any negotiation talks between Russia and Ukraine may ease domestic soy prices in tandem with CBOT soybean prices and crude oil prices.
- Arrivals are decreasing and despite firm prices, farmers are still holding Soybean in anticipation of better prices.
- Amid Russia Ukraine negotiation talks soybean may ease on the back of expectation of sunflower oil import and decline in crude oil prices.
- In Madhya pradesh, Soybean arrival has declined by 35-40%, In Maharastra, arrivals is low by 35-40% and in Rajasthan arrivals is low by 25-30% as compared to previous month. Bullish CBOT soybean and tight arrivals underpinning Soybean prices.
- Amid high inflation and decrease in forex, Argentina has raised the export tax rate on soy oil and meal by two percentage points to 33% until the end of the year.
- Solvent Extractors Association (SEA) reported India's Soy oil imports in Feb'22 up by 32% to 3,76,594 tonne as compared to 2,85,973 tonne in Feb'21. Additionally, soy oil import in Nov-Feb'22 went up by 74% to 16,34,383 tonne as compared to 9,38,233 tonne previous year same period. The import of soybean oil is up due to decline in domestic crushing trigged by low soymeal demand and tight crush margin. We expect higher imports in upcoming months too due to sunflower oil import disruption because of Russia-Ukraine conflict.
- SOPA reported, February'22 crushing 19% lower at 6.5 lakh tonne as compared to 8 lakh tonne previous year same period. While soybean crushing till February this Oil Year was low by 37% at 34 lakh tonne compared to 54 lakh tonne previous year. Additionally, soymeal production is expected to be

lower at 27.14 lakh tonne in the ongoing Oil Year compared to 43.10 lakh tonne previous year. We expect lower crushing in March too on low export demand.

- Acccording to SOPA estimates, soymeal demand in food sector is up by 33% to 8 lakh tonne in MY 2021-22 from previous year at 6 lakh tonne. In the Oct'21-Feb'22, soymeal offtake in food sector was estimated at 3.45 lakh tonne from 2.55 lakh tonne in same period last year.
- USDA, in it's March'22 report, kept India's soybean 2021-22 production estimate unchanged at 11.9 million metric tonne (MMT) compared to previous month estimates. Soybean crush is increased by 2 lakh tonne at 102 lakh tonne Vs 100 lakh tonne in previous month estimates.
- Government is monitoring demand and supply situation to fill the edible oil void created due to Russia-Ukraine conflict as India imports 25 lakh tonne sunflower oil anually.
- As per 2nd Advance Estimates, released by the Department of Agriculture and Farmers Welfare, the estimated production of soybean during 2021-22 is 131.16 lakh tonne vs 128.97 lakh tonne last year.
- As per AgriWatch estimates, total availability of soymeal in the country for MY 2021-22 is likely to be 80 lakh tonne. Annual soymeal consumption stands between 60-65 lakh tonne while 15-18 lakh tonne soymeal is exported annually. So, demand and supply of soymeal in the country seems balanced.
- AgriWatch has estimated India's 2021-22 soybean output estimate at 12 million tonne, vs 10.45 million tonne in 2020-21.
