Soybean

- Upon low soymeal export demand, there is sluggish Soy demand by the crushers, arrivals has declined to seven months low. Farmers are still not releasing their holdings. Traders are more interested to buy Rabi crops such as mustard than Soybean at higher level, However stock limit is a hurdle to buy new stuff beyond 2000 Qtl.
- GOI has extended the period of stock limit, imposed on edible oils and oilseeds till 31st December, 2022 which was previously

extended till 30th June 22. Exceptions have been given for exporters and importers. This will impact the prices in long term. The quantity specified are-

			Retail outlets	Depot	
Edible oil	30 Quintals	500 Quintals	30 Quintals	1000 Quintals	90 days of storage capacity
Edible oilseeds	100 Quintals	2000 Quintals	--	--	90 days production of edible oils, as per daily input production capacity

- India imports usually 1.75-2 Lakh tonnes of sunflower oil per month from Russia and Ukraine. The Russia-Ukraine conflict has disturbed Sunflower oil supply. Additionally, Indonesia announced to increase limit of domestic sell from 20% to 30% on 9th March. Tight domestic edible oil supply pushed higher Soy prices too. However, In the Upcoming week, any negotiation talks between Russia and Ukraine may ease domestic soy prices in tandem with CBOT soybean prices and crude oil prices.
- Arrivals are decreasing and despite firm prices, farmers are still holding Soybean in anticipation of better prices.
- Amid Russia Ukraine negotiation talks soybean may ease on the back of expectation of sunflower oil import and decline in crude oil prices.
- In Madhya pradesh, Soybean arrival has declined by 35-40%, In Maharastra, arrivals is low by 35-40% and in Rajasthan arrivals is low by 25-30% as compared to previous month. Bullish CBOT soybean and tight arrivals underpinning Soybean prices.
- Amid high inflation and decrease in forex, Argentina has raised the export tax rate on soy oil and meal by two percentage points to 33% until the end of the year.
- Solvent Extractors Association (SEA) reported India's Soy oil imports in Feb'22 up by 32% to 3,76,594 tonne as compared to 2,85,973 tonne in Feb'21. Additionally, soy oil import in Nov-Feb'22 went up by 74% to 16,34,383 tonne as compared to 9,38,233 tonne previous year same period. The import of soybean oil is up due to decline in domestic crushing triggered by low soymeal demand and tight crush margin. We expect higher imports in upcoming months too due to sunflower oil import disruption because of Russia-Ukraine conflict.

- SOPA reported, February'22 crushing 19% lower at 6.5 lakh tonne as compared to 8 lakh tonne previous year same period. While soybean crushing till February this Oil Year was low by 37% at 34 lakh tonne compared to 54 lakh tonne previous year. Additionally, soymeal production is expected to be lower at 27.14 lakh tonne in the ongoing Oil Year compared to 43.10 lakh tonne previous year. We expect lower crushing in March too on low export demand.
- According to SOPA estimates, soymeal demand in food sector is up by 33% to 8 lakh tonne in MY 2021-22 from previous year at 6 lakh tonne. In the Oct'21-Feb'22, soymeal offtake in food sector was estimated at 3.45 lakh tonne from 2.55 lakh tonne in same period last year.
- USDA, in its March'22 report, kept India's soybean 2021-22 production estimate unchanged at 11.9 million metric tonne (MMT) compared to previous month estimates. Soybean crush is increased by 2 lakh tonne at 102 lakh tonne Vs 100 lakh tonne in previous month estimates.
- Government is monitoring demand and supply situation to fill the edible oil void created due to Russia-Ukraine conflict as India imports 25 lakh tonne sunflower oil annually.
- As per 2nd Advance Estimates, released by the Department of Agriculture and Farmers Welfare, the estimated production of soybean during 2021-22 is 131.16 lakh tonne vs 128.97 lakh tonne last year.
