

Oilseeds Domestic Fundamentals:

Today's Update-

Today in Indore, soybean plant prices went down by 1% to Rs. 6,900/qtl. amid edible oil import tariff cut and soymeal import. In other cash markets too, soybean traded with weak sentiments. Soybean (plant delivery, Indore) prices are expected to trade with weak bias in the range of 6800-7200/qtl levels in the near-term tracking Soymeal import and import tariff cut. The government scrapped customs duty and agriculture infrastructure development cess on the import of crude soyabean oil and crude sunflower oil for 20 lakh metric tonnes each per year to ease local prices.

Weather Updates-

The SW monsoon is expected to reach Kerala during the next two to three days, a slow start to seasonal rains. Earlier, the India Meteorological Department (IMD) had forecast the onset over Kerala on Friday (May 27) with help from the remnants of Cyclone Asani, that struck the Bay of Bengal a fortnight ago. The forecast had a model error of four days.

International:

According to USDA latest report, US Soybean planting progress reached at 50% vs 73% last year and 55% five-year average.

According to General Administration of Customs, China's soybean imports from Brazil in April surged from the previous month with the arrival of delayed cargoes. China, the world's top importer of soybeans, received 6.3 million tonnes of the oilseed from Brazil in April, up 120% from 2.87 million tonnes in March.

RM seed

Today's Update-

Today Jaipur RM seed prices went down by 1.4% Rs. 6,900/qtl. In other cash markets too, traded with weak sentiments. RM seed prices are expected to trade with weak bias in the range of 6,800-7100 in near term tracking edible oil tariff cut by the government.

Previous Updates-

- RM seed crushers are facing challenges as farmers hold back anticipating higher price which has resulted into almost 45% decline in market arrivals in April'22 compared with March which is affecting the crushing of the oil seed.
- Currently, Mustard is trading at three months high, tracking Palm oil export ban by Indonesia coupled with shrinking arrivals. The premium of mustard oil over CPO has been reversed to discount due to low palm oil supply side. Currently, CPO to Mustard spread has become positive at INR 70-100/ 10 Kg. This is likely to push the demand for Mustard oil, as it's been seen that at palm oil demand at higher prices is usually substituted with comparatively discounted oils. It is inferred that discounted mustard oil price will boost crushing and so the RM seed demand which is likely to underpin RM seed prices.
- Statistics Canada on Tuesday pegged Canada's 2022 canola plantings at 20.9 million acres, down 7% from last year, 6% below the five-year average and lighter than analyst expectations of 22.1 million.
- According to of Agriculture and Agri-Food Canada's (AAFC), Demand for Canadian Canola remains firm on a strong world oilseed crush and high prices for competing oilseeds and vegetable oils. Disruption of Black Sea exports of sunflower seed oil as a result of the Russian invasion of Ukraine is tightening world supplies and supporting world prices. Domestically, processing of canola is

estimated to fall to 8.5 Mt, a drop of 18% from last year, while exports are expected to fall by 49% to 5.4 Mt, as commercial buyers outbid exporters for the tight supplies. For the crop year, the major importers of Canadian canola to-date are China, Japan, Mexico and the European Union.

- In order to check blending of mustard oil with other edible oil, FSSAI has directed state food safety officials. And has also sought an action taken report from the states by May 15, 2022, and added that the enforcement department should be informed at regular intervals about the same.
- USDA, in its April'22 reports, kept India's 2021-22 production estimate at 108 lakh tonnes, crushing estimate at 96.50 lakh tonne as compared to 75 lakh tonnes.

Groundnut:

Groundnut bold 60/70 prices continued to trade above Rs. 9,100/qtl. on good domestic demand. However, there is sluggish export demand this year on high freight charges to the potential destinations. 60/70 Groundnut bold average prices are likely to trade with firm bias in the range of INR 9,000-9,200/Qtl. in short run.
