

## **Oilseeds Domestic Fundamentals:**

## Today's Update-

Today in Indore, soybean plant prices rebounded on good demand at lower level and went up by 3.73% to Rs. 6,950/qtl. In other cash markets too, soybean traded with firm sentiments except Maharashtra. Soybean (plant delivery, Indore) prices are expected to trade with weak bias in the range of 6700-6900/qtl levels in the near-term tracking Soymeal import and edible oil import tariff cut.

## Weather Updates-

The SW monsoon is expected to reach Kerala during the next two to three days, a slow start to seasonal rains. Earlier, the India Meteorological Department (IMD) had forecast the onset over Kerala on Friday (May 27) with help from the remnants of Cyclone Asani, that struck the Bay of Bengal a fortnight ago. The forecast had a model error of four days.

6 Station Reporting Rainfall

# International:

According to USDA latest report, US Soybean planting progress reached at 66% vs 50% a week ago, 83% a year ago and 67% five-year average.

According to General Administration of Customs, China's soybean imports from Brazil in April surged from the previous month with the arrival of delayed cargoes. China, the world's top importer of soybeans, received 6.3 million tonnes of the oilseed from Brazil in April, up 120% from 2.87 million tonnes in March.

#### RM seed

#### Today's Update-

Today Jaipur RM seed prices went down by 0.4% Rs. 6,850/qtl. In other cash markets too, traded with weak sentiments. Oil millers are currently doing need-based buying whereas, farmers are unwilling to sell their produce at discounted price. Moreover, traders are not aggressively buying due to stock limit and strict inspections/stock checks by the government. RM seed prices are expected to trade with weak bias in the range of 6,800-7100 in near term tracking edible oil tariff cut by the government.

#### **Previous Updates-**

- China has removed a three-year restriction on imports of Canadian canola seed. China, the world's top oilseed buyer, suspended two Canadian canola exporters in March 2019, alleging that pests had been detected in shipments.
- However, low stocks of canola, are expected to limit export to China. Canada, the world's biggest producer and exporter of canola, produced its smallest canola crop in 13 years in 2021, pushing buyers to look elsewhere for supplies, and supporting record global edible oil prices.
- For 2022-23, the area seeded to canola is expected to decrease by 7% to 8.5 million hectares (Mha) based on Statistics Canada's Seeding Intentions Survey.
- RM seed crushers are facing challenges as farmers hold back anticipating higher price which has resulted into almost 45% decline in market arrivals in April'22 compared with March which is affecting the crushing of the oil seed.
- Statistics Canada on Tuesday pegged Canada's 2022 canola plantings at 20.9 million acres, down 7% from last year, 6% below the five-year average and lighter than analyst expectations of 22.1 million.
- According to of Agriculture and Agri-Food Canada's (AAFC), Demand for Canadian Canola remains firm on a strong world oilseed crush and high prices for competing oilseeds and vegetable oils. Disruption of Black Sea exports of sunflower seed oil as a result of the Russian invasion of Ukraine is tightening world supplies and supporting world prices. Domestically, processing of canola is estimated to fall to 8.5 Mt, a drop of 18% from last year, while exports are expected to fall by 49% to 5.4 Mt, as commercial buyers outbid exporters for the tight supplies. For the crop year, the major importers of Canadian canola to-date are China, Japan, Mexico and the European Union.
- In order to check blending of mustard oil with other edible oil, FSSAI has directed state food safety officials. And has also sought an action taken report from the states by May 15, 2022, and added that the enforcement department should be informed at regular intervals about the same.

#### **Groundnut:**

Groundnut bold 60/70 prices continued to trade above Rs. 9,000/qtl. on good domestic demand. However, there is sluggish export demand this year on high fright charges to the potential destinations. 60/70 Groundnut bold average prices are likely to trade with firm bias in the range of INR 9,000-9,200/Qtl. in short run.
