

**Oilseeds Domestic Fundamentals:**
**Today's Update-**

Today in Indore, soybean plant prices extended previous day loss and went down by 1.19% to Rs. 6,250/qtl. In other cash markets too, soybean traded with weak bias amid weak demand in cash market. Soybean (plant delivery, Indore) prices are expected to trade with weak bias in the range of 6000-6500/qtl levels in the near-term tracking soy meal import and weak demand from crushers on squeeze in crush margin.

According to SOPA, India's Oct-Jul soy arrivals fell to 82 Lakh tonnes from 90.25 Lakh tonnes year ago, crushing shrank to 67.50 Lakh tonnes from 87.50 Lakh tonnes year ago while stocks with millers, traders, farmers swell to 40.52 Lakh tonnes from only 8.82 Lakh tonnes a year ago. Low Soymeal export demand and squeeze in crush margin resulted into low crushing.

**Soybean Sowing Updates:** From 1st June'22- 16th Aug'22, cumulative rainfall recorded above average by 30% in Maharashtra, 16% in MP, in Rajasthan cumulative rainfall remained above average at 41%. As on 12th Aug'22 All India Kharif soybean sowing progress is up by 1% to 118.73 Lakh hectare as compared to 117.93 Lakh hectare last year in the same period. Agriwatch expects soybean acreage to decline by 5-8% amid acreage shift to cotton and Maize.

### International market update:

Currently, 24% of the Soybean production is within an area experiencing drought as compared to 28% previous week.

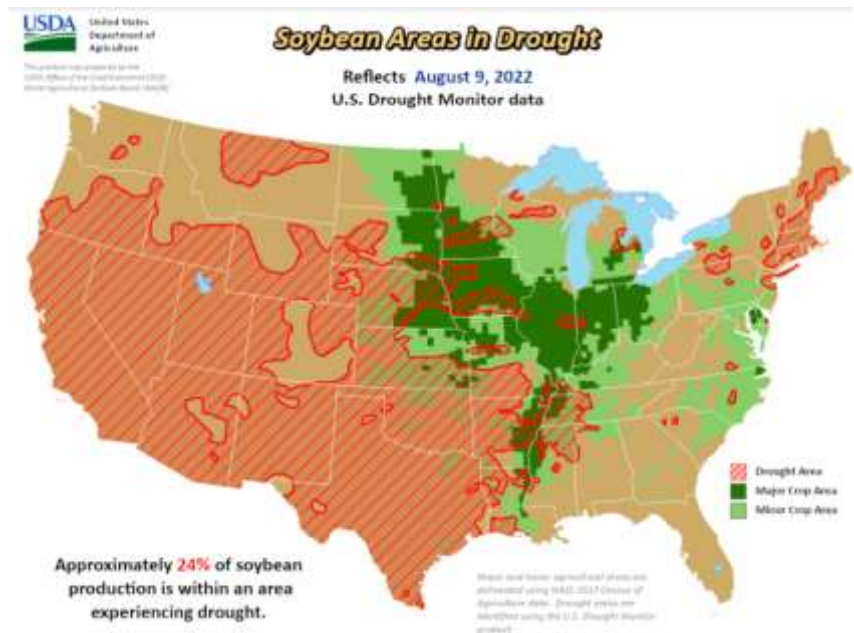

USDA has slashed USA's 2022-23 Soybean production estimate in its June 22 report, by -2.91% to 122 MMT as compared to 126 MMT previous month. However, Soy production is still up by 2% as compared to previous year. Whereas Brazil's 2022-23 Soybean production estimate kept unchanged at 149 MMT MoM and 18% up as compared to last year. Argentina's 2022-23 Soybean production estimates too kept unchanged at 51 MMT as compared to previous month estimates whereas 16% up as compared to previous year. India's 2022-23 Soybean production kept unchanged as compared to previous month estimates while 3% lower production estimates at 11.5 MMT as compared to 11.9 MMT previous year.

Overall, there is 1% of production cut at 391 MMT as compared to 395 MMT previous month estimates. However, there is an 11% increase in total soybean production estimates as compared to previous year.

Overall, there is 1% of production cut at 391 MMT as compared to 395 MMT previous month estimates. However, there is an 11% increase in total soybean production estimates as compared to previous year.

Overall global supply seems comfortable, however crop condition in USA, crude oil prices and export demand from China likely to set the tone of the market.

According to USDA's latest report, 3% of Soybean crop is in very poor condition, unchanged as compared to previous week, 9% is in poor condition Vs 8% previous week, fair condition remained unchanged at 30% as compared to previous week, 48% in good condition Vs 49% in previous week and 10% in excellent condition, unchanged as compared to previous week.

### RM seed

#### Today's Update-

Today Jaipur RM seed prices went marginally down by 0.4% to Rs. 6,975/qtl. amid subdued demand in the cash market. In Newai, Rajasthan most of the expellers are shut and only kachhi ghani is operational amid disparity in crushing. Mustard is currently premium over competing oils such as soy oil and CPO. Hence, there is weak demand of Mustard in the market and has kept RM seed prices under pressure. RM seed prices are expected to trade with weak bias in the range of 6,800-7200 in near term tracking weak demand from crushers.

#### Previous Updates-

For 2022-23, the area seeded to canola is expected to decrease by 7% to 8.5 million hectares (Mha) based on Statistics Canada's Seeding Intentions Survey.

Statistics Canada has pegged Canada's 2022 canola plantings at 20.9 million acres, down 7% from last year, 6% below the five-year average and lighter than analyst expectations of 22.1 million.

According to Agriculture and Agri-Food Canada's (AAFC), Demand for Canadian Canola remains firm on a strong world oilseed crush and high prices for competing oilseeds and vegetable oils. Disruption of Black Sea exports of sunflower seed oil as a result of the Russian invasion of Ukraine is tightening world supplies and supporting world prices. Domestically, the processing of canola is estimated to fall to 8.5 Mt, a drop of 18% from last year, while exports are expected to fall by 49% to 5.4 Mt, as commercial buyers outbid exporters for the tight supplies. For the crop year, the major importers of Canadian canola to-date are China, Japan, Mexico and the European Union.

#### Groundnut:

Low ending stock, lag in sowing progress, good domestic groundnut oil demand and rebound in groundnut oil export demand has kept Groundnut bold 60/70 prices elevated. 60/70 Groundnut bold average prices are likely to trade with firm bias in the range of INR 9,500-10,000/Qtl. in the short run.

As on 12th Aug'22  
All India Kharif  
Groundnut sowing  
progress is lagging  
by 10% to 42.87  
Lakh hectare as  
compared to 47.46  
Lakh hectare last  
year in the same  
period. From 1st  
June'22 to 16th  
July'22 cumulative

| Statewise Groundnut sowing progress as on 12th Aug'22 (Lakh Ha) |       |       |          | Cumulative Rainfall<br>Departure (%) 1st<br>June to 16th Aug'22 |
|---|-------|-------|----------|---|
|   | 2022  | 2021  | % Change |   |
| Gujarat   | 16.94 | 19.01 | -11%     | 33%   |
| Rajasthan   | 7.84  | 7.49  | 5%       | 42%   |
| Karnataka   | 2.84  | 4.25  | -33%     | 33%   |
| Andhra Pradesh  | 5.00  | 6.16  | -19%     | 18%   |
| Others  | 10.26 | 10.55 | -3%      |   |
| Total   | 42.87 | 47.46 | -10%     |   |

rainfall departure recorded up by 33% in Gujarat, 42% in Rajasthan, 33% in Karnataka and 18% in

Andhra Pradesh. Agriwatch expects Groundnut 2022-23 Kharif sowing acreage is likely to decline by 8-12%. Acreage is likely to shift to cotton on lucrative prices.
