International market update:

Chicago soybeans ticked higher on Friday, although the market stayed on track for a third weekly decline, weighed down by slowing purchases from top importer China and expectations of record production in Brazil.

Soybean production in Argentina is expected to reach 48 million tonnes in 2022/23, the Buenos Aires grains exchange said on Wednesday.

During the week under review CBOT Soybean (Nov'22 expiry) went down by 1.02% to \$14.11 a bushel following broad declines in commodities tied to worries about global recession curbing demand.

As per sources, Soymeal prices in China, the world's top consumer of the animal feed ingredient, are at record highs as rising demand from farmers follows months of lacklustre soybean imports.

Statistics Canada lowered its production forecast to 19.1 million tonnes from the previous estimate of 19.5 million tonnes. ICE Canola in last two weeks went up by more than 6% amid lower production estimates.

According to USDA latest production estimates, global canola production was increased by 14% from 72.31 MMT last year to 82.48 MMT this year due to increased output from Canada, Russia, USA and UK on higher yields resulting from favourable weather conditions.

Previous Updates-

For 2022-23, the area seeded to canola is expected to decrease by 7% to 8.5 million hectares (Mha) based on Statistics Canada's Seeding Intentions Survey.

Statistics Canada has pegged Canada's 2022 canola plantings at 20.9 million acres, down 7% from last year, 6% below the five-year average and lighter than analyst expectations of 22.1 million.

According to of Agriculture and Agri-Food Canada's (AAFC), Demand for Canadian Canola remains firm on a strong world oilseed crush and high prices for competing oilseeds and vegetable oils. Disruption of Black Sea exports of sunflower seed oil as a result of the Russian invasion of Ukraine is tightening world supplies and supporting world prices. Domestically, the processing of canola is estimated to fall to 8.5 Mt, a drop of 18% from last year, while exports are expected to fall by 49% to 5.4 Mt, as commercial buyers outbid exporters for the tight supplies. For the crop year, the major importers of Canadian canola to-date are China, Japan, Mexico and the European Union.
