Brazil soybean premiums sink to all-time lows.

Soybean cash premiums in Brazil have dropped to historical low levels amid an ongoing record harvest coupled with slow Chinese demand due to unattractive crush margins.

According to a report by the Rosario stock exchange (BCR), Argentina's position as the leading exporter of processed soy meal worldwide is at risk due to the impact of an unprecedented drought on its main cash crop. The report predicts that Brazil, Argentina's neighbouring country, is likely to surpass its soy meal shipments for the first time in 25 years during the current harvest. The report also indicates that the national output of soy meal for the 2022/2023 season is expected to decline by 36% from the previous year, with an estimated total of only 27 million tonnes.

According to AgRural, 76% of soybean harvesting has been completed, up by 6% compared to the previous week, down by 5% from last year. Delay in harvesting is mainly due to persistent rainfall. CONAB has estimated 22/23 Brazilian soybean at 151.419 MMT (152.889MMT) down by 1.5 MMT

RM seed

Today's Update-

In Jaipur, the price of RM seeds prices remained stable at INR 5,550 per quintal, amid weak demand from millers and increased arrivals. All over India, RM seed arrivals for the day was recorded at 13.5 Lakh bags Vs 12.5 Lakh bags previous day. In Rajasthan, the arrivals recorded at 7.5 Lakh bags vs 7 lakh bags previous day.

NAFED has reported that, as of April 13th, 2023, a total of 116280 tonnes of Mustard have been procured in four states, namely Haryana, Madhya Pradesh, Gujarat, and Rajasthan.

Groundnut:

Groundnut bold premium at Rajkot market went marginally up by 0.1% at INR 7,755/Qtl. In upcoming days, Groundnut average prices is likely to trade range bound in the range of INR 7,000-7,800/Qtl in short run amid lower availability and good demand.

The sowing of new crops will commence in June or July. Although prices have risen recently, they have remained steady due to robust local demand. Although demand from Europe and Russia has decreased in recent times, there is regular demand from Asian countries such as Indonesia, Vietnam, and others, despite increased prices. The previous crop was not of the highest quality, yet demand remained firm. Therefore, if this trend continues, prices may continue to rise.

In China, if the weather conditions cooperate, the new crop has the potential to recover from the poor last crop. However, consumption remains volatile and weak. China had been exploring options beyond Africa for crushing, but it seems that Senegal and Sudan remain significant alternative sources of a reliable supply. A competitive option for supply and pricing can be found in the volume of oil exported from various origins, including Brazil. As the situation with China's new crop and alternative sources settles, it is possible that China may show less interest in pursuing new business.

Sunflower:

Today, Sunflower in Maharashtra/Karnataka remained stable at INR 6,200/Qtl.

As per the USDA oilseed March 2023 (monthly) report, the world total production of sunflower seed is estimated to decrease by 12% and reach 50.29 MMT as compared to 57.3 MMT in the previous year. While in Russia it is projected to increase by 3%, however a drop of 41% is estimated in Ukraine while an decrease of 6% in Argentina and the sun oil exports are estimated to be up in Russia to 4 MMT Vs 3.1 MMT previous year while down in Ukraine at 3.95 MMT Vs 4.46 MMT in previous year. The world's total ending stocks are estimated to be down at 4.3 MMT Vs 8.0 MMT previous year.

Sesame

Today, sesame (White) sesame traded steady at INR 12900/Qtl. amid subdued trading activities.
