

## Oilseeds Domestic Fundamentals:

### Today's Update-

Today, the Indore Soybean plant prices went marginally down by 0.38% to INR 5,250/Qtl. as compared to the previous day at INR 5,270/Qtl. amid the decline in demand. The increase in Soy oil prices coupled with decrease in arrivals as compared to the previous day may support the soybean seed prices.

### MSP for Kharif Season (2023-24)

Minimum Support Prices for Kharif Marketing Season (KMS) 2023-24							
Crops	MSP 2014-15	MSP 2022-23	MSP 2023-24	Cost* KMS 2023-24	Increase in MSP over 2022-23	Margin over cost in per cent	Increase in MSP over 2022-23 in %
Groundnut	4000	5850	6377	4251	527	50	9%
Sunflower Seed	3750	6400	6760	4505	360	50	6%
Soybean (Yellow)	2560	4300	4600	3029	300	52	7%
Sesamum	4600	7830	8635	5755	805	50	10%
Nigerseed	3600	7287	7734	5156	447	50	6%

Government has increased the MSP of Kharif Crops for Marketing Season 2023-24, to ensure remunerative prices to the growers for their produce and to encourage crop diversification.

### International market update:

In Argentina, the total soybean production is expected far below the previous year's yield at just 21 million metric tonnes. Although Argentina is the world's leading exporter of soybean, but due to an

unprecedented drought that commenced last year, expectations for the 2022/2023 harvest have been reduced by half.

As of 4th June, 2023, the most recent report from the USDA reveals that the progress of soybean planting has reached a total of 91% completion vs 76% previous year same period. This surpasses the typical five-year average of 76% for this period in the year.

Brazil is poised to export a minimum of 200,000 metric tons (mt) of soybeans to the United States from the last weeks of May to the beginning of June. Brazil ships some quantities of soybeans to the US, particularly during the summer months in the northern hemisphere. However, this year's bilateral trade is anticipated to surpass the usual levels due to Brazil's exceptional soybean crop, which has resulted in highly competitive prices in the South American nation. If all the cargoes and volumes are confirmed, the total Brazilian soybean exports to the US during this time frame would exceed 200,000 mt. This is in addition to the 46,153 mt shipped from January to April, according to Brazil's customs data. As a result, this year's soybean trade between the two countries is already poised to be the largest since 2014, when Brazil set a record by exporting over one million mt of soybeans to the US.

As of the end of last week, the soybean harvest stood at 78%, which is lower compared to 91% at the same time last year and the average of 92%. This indicates a weekly progress of 9%. In the primary soybean production regions, the harvest is nearing completion, with approximately 95% of the crop already collected.

Currently, Indore Soybean plant prices is likely to remain subdued in the range of INR 5,200-5,500/Qtl in the short run.

### RM seed

#### Today's Update-

The RM seed Jaipur prices went up by 2% at INR 5,225/Qtl. as compared to previous day at INR 5,125/Qtl. amid decline in arrivals. Across India, arrivals of RM seed were 6 lakh bags.

As per NAFED latest report, a total of 7,55,472 Metric tonnes of Mustard have been procured in four states, namely Haryana (3.47 Lakh tonnes), Madhya Pradesh (1.67 Lakh tonnes), Gujarat (0.68 Lakh tonnes), and Rajasthan (1.61 Lakh tonnes).

### International market update:

The canola area is projected to experience a slight increase to 8.8 million hectares in 2023-2024 due to favourable prices. However, this expansion is constrained by the similarly favourable prices of other crops like wheat and peas. If crop abandonment rates and yields continue to follow trends, the production is estimated to be around 18.5 million metric tons.

Both domestic crush and exports are forecasted to remain at similar levels as in 2022-23, with domestic crush predicted to be around 9.5 million metric tons and exports at 8.8 million metric tons. This projection is supported by the ongoing strong global demand for oilseeds, vegetable oils, and protein meals.

Assumptions for feed use, residue, and impurity levels are set at normal levels. Carry-out stocks are expected to slightly increase to 1.1 million metric tons, compared to 1.0 million metric tons in 2022-23 and the five-year average of 2.3 million metric tons.

The Canadian canola supply for the 2022-23 period is projected to reach 19.1 million metric tonnes (Mt), which is 22% higher compared to the previous year. This increase is primarily due to the recovery in production following the drought in 2021-22, although it was somewhat balanced by existing stocks. Canola cultivation covered an area of 8.7 million hectares (Mha) in Canada, with 8.6 Mha successfully harvested. Yields returned to nearly normal levels, averaging 2.11 tonnes per hectare (t/ha). The estimated production for the year is 18.2 Mt.

### **Mustard outlook**

Currently, RM seed is trading at three years low tracking weak demand from oil millers amid disparity due to weak mustard oil prices. As per Agriwatch primary sources, upon disparity, most of the expeller are shut and only few kacchi ghani are operational. Farmers are reluctant to offload their stock at current levels in anticipation of better prices in future. And millers are buying as per their daily need for crushing.

Jaipur mustard is likely to remain weak in the range of INR 5,000-5,500/Qtl in the short run.

### **Groundnut:**

Groundnut bold premium at Rajkot market went up by 2.6% at INR 7800/Qtl. as compared to the previous day at INR 7600/Qtl. In upcoming days, Groundnut average prices is likely to trade range bound in the range of INR 7,400-8,000/Qtl in short run amid low availability and good export demand.

In contrast to the sharp decline in prices of other oilseeds, groundnut prices have remained robust due to increased export demand and low production. The weak performance of summer season crops, including groundnuts, further contributes to the sustained high prices. There has been a year-long increase of over 20 percent in groundnut prices, with a recent 2.5 percent surge within the past month. Despite a significant decrease in the prices of other oilseeds, groundnut prices have remained strong, primarily due to extensive exports to Gulf countries and China.

Groundnut Kharif Sowing Progress (as on 2nd June '23)
